

What is the iShares energy storage & materials ETF?

The iShares Energy Storage & Materials ETF (the "Fund") seeks to track the investment results of an index composed of U.S. and non-U.S. companies involved in energy storage solutions aiming to support the transition to a low-carbon economy, including hydrogen, fuel cells and batteries.

Should you invest in energy stocks in 2022?

Energy stocks have soared in 2022, but there are many ways to invest in the sector. Here are some of the best ETFs for investors! Update (August 24, 2022): I recently finished the mid-year update of my Best Energy ETFs report. I added the handful of new ETFs that were launched in 2022 and added some new commentary.

What happened to the energy sector in 2022?

The energy sector has been a tale of two time periods in 2022. Through June 8th, the Energy Select Sector SPDR ETF (XLE) gained 67% and was far and away the top performing sector. Since then, XLE has fallen 13% and has been the market's worst performer. It's still up 46% on the year as a whole, but it's been a big reversal.

What are energy ETFs?

These invest in stocks of companies in the energy industry, including oil and natural gas producers and transporters, utility operators and alternative energy firms. See the gallery for the 10 best-performing energy ETFs, excluding leveraged and inverse funds. Assets are as of March 14 after market close unless otherwise noted.

What is the ESS ETF?

The ESS ETF is an European ETF that follows the performance of firms specializing in battery energy storage systems. The companies included are engaged in such categories as raw materials, manufacture, enabler, and emerging technologies. It is the second European ETF in this sector after BATT.

Which ETFs cover the energy sector?

There are three ETFs available that would qualify as cheap beta offerings that cover the energy sector. Not surprisingly, they come from State Street, Vanguard and Fidelity and occupy three of the top 4 spots in these rankings.
