

6 billion worth of energy storage investment

Is solar PV the future of energy storage?

Despite the fall in unit prices for energy storage, a total of US\$3.6 billion of investment was committed to energy storage projects in 2020, around the same amount as in 2019. A new report from BloombergNEF looking at investment trends in the global energy transition found that solar PV led a jump in energy transition investments throughout 2020.

How did energy storage investment perform in 2020?

BNEF's report showed that energy storage investment was driven by growth in Asia Pacific and American markets, while EMEA funding slowed down. Image: BNEF Despite the fall in unit prices for energy storage, a total of US\$3.6 billion of investment was committed to energy storage projects in 2020, around the same amount as in 2019.

How many energy storage financing and investment deals were completed in 2024?

Through the first three quarters of 2024, 83 energy storage financing and investment deals were reported completed for a total of \$17.6 billion invested. Of these transactions, 18 were M&A transactions, up from 11 transactions during the same period in 2023.

How much energy is being invested in the Americas?

The Americas region saw "record investment" in energy storage last year at a rate of US\$1.2 billion, although the report found a marked slowdown in investment in Europe, the Middle East and Africa, where funding stood at US\$600 million.

Is 2018 still the record year for energy storage?

BloombergNEF said however that 2018 still remains the record year for energy storage, when US\$4.5 billion of investment was made worldwide.

Does bloombergnef invest in energy storage?

BloombergNEF's reporting of energy storage investment focused only on stationary storage projects and excluded pumped hydro, compressed air energy storage and hydrogen projects, with the latter accounted for elsewhere in the company's Energy Transition Investment Trends report. Additional reporting for Energy-Storage.news by Andy Colthorpe.

Transforming our Energy System, Creating Good Paying Jobs, and. Saving Americans on their Energy Bills . Through the American Recovery and Reinvestment Act (Recovery Act), President Obama made the largest single investment in clean energy in history, providing more than \$90 billion in strategic clean energy investments and tax incentives to ...
