

Bandar seri begawan 14th five-year plan advanced energy storage materials

What is China's new energy storage development plan?

On March 21, the National Development and Reform Commission (NDRC) and the National Energy Administration of China issued the New Energy Storage Development Plan During China's "14th Five-Year Plan" Period. The plan specified development goals for new energy storage in China, by 2025, new

What are the two stages of energy storage in China?

The first stage (during China's 13th Five-Year Plan period) realizes the energy storage from the R&D demonstration stage to the initial stage of commercialization; the second stage (during China's 14th Five-Year Plan period) realizes the energy storage from the initial stage of commercialization to the stage of large-scale development.

Will pumped storage projects be accelerated during the 14th five-year plan?

On April 2, 2022, the National Development and Reform Commission and the Energy Administration jointly issued a notice to accelerate the development and construction of pumped storage projects during the 14th Five-Year Plan period.

When will new energy storage development be introduced?

The commission said earlier it will introduce a plan for new energy storage development for 2021-25 and beyond, while local energy authorities should also make plans for the scale and project layout of new energy storage systems in their regions.

Will energy storage industrialization be a part of the 14th five-year plan?

While looking back on 2020, we also look forward to the development of energy storage industrialization during the 14th Five-year Plan, as policy and market mechanisms become the key to promote the full commercialization and large-scale application of energy storage.

What is the 14th five-year plan for modern energy system?

In January 2022, "the 14th Five-Year Plan for Modern Energy System" proposed accelerating the large-scale application of energy storage technologies. Optimize the layout of grid-side energy storage. Play the multiple roles of energy storage, such as absorbing new energy and enhancing grid stability.

2021 marks a special year in which China will achieve a moderately prosperous society, celebrate the 100th anniversary of the Communist Party of China and kick off its 14th Five-Year Plan (14th FYP). The 14th FYP not only focuses on China's development over the next five years but also outlines future objectives to be achieved by 2035.

Although thermal energy storage based on phase change materials (PCMs) may seem an attractive energy
