As of the first half of 2023, the world added 27.3 GWh of installed energy storage capacity on the utility-scale power generation side plus the C& I sector and 7.3 GWh in the residential sector, totaling 34.6 GW, equaling 80% of the 44 GWh addition last year. Despite a global installation boom, regional markets develop at varying paces.

two-thirds of primary energy supply, making Panama vulnerable to global price volatility and rising costs for fuel imports. At the same time, the growing impact of climate change has led to droughts and disrupted the country's hydropower resources. To address these challenges, Panama's National Energy Plan 2015-2050 has started moving the

Energy services not only power our personal lives but also function as crucial inputs within the production and supply chains of various businesses. The quality, or a lack thereof, of these services can significantly impact a company's cost structure and, subsequently, its competitiveness within the business ecosystem.
