

Should I buy gold bars or coins?

Gold bars are minted by both sovereign and private mints, while gold coins, which are considered a legal tender, are struck by sovereign mints. Whether to buy gold bars or coins is entirely up to you; your particular needs and preferences should determine your choices.

Are gold bars a good investment?

Gold bars are now primarily used as an investment or a store of value. They come in different formats and sizes, each with its own distinctions and advantages. This chapter will explore gold bars in detail and demystify the choices available to you as a new investor looking to buy investment-grade gold bars. Investment Grade Gold

Should you save on storage costs for gold bars?

Don't compromise on storage quality to save on costs. Cutting corners on security or choosing unverified storage solutions can lead to significant losses. And, considering how valuable your gold bars are, it's simply not worth the risk to save a few dollars on storage costs.

What influences the resale value of a gold bar?

The resale value of a gold bar depends on three main factors: gold content and weight, condition, and beauty. If your gold bar arrived in an Assay Card or another certification package, be sure to keep it in its original packaging.

How does gold storage work?

For example, one company's allocated gold storage allows you to "own the whole bar" of gold, but upon withdrawal, you will receive a "near-identical" form of gold. What this means is that you could buy and store a 1-kilogram gold bar for years and only know the bar's brand and serial number only upon withdrawal.

Should I store my gold bars myself?

For a monthly fee, investors can have their gold bars stored and managed at a highly secure safe or depository. Storing gold bars yourself can be expensive and risky, as large gold stacks can be expensive to store and there's a risk of having your bars stolen or damaged.
