

Do all Hulks have the same powers?

While every Hulk is born through exposure to extreme amounts of gamma radiation, not every Hulk ends up with the same powers. In addition to their shared immortality, these avatars of the One-Below-All are each bestowed unique gifts of destruction.

What makes hulks different?

Sure, every Hulk is prone to some mindless smashing; Many gained the propensity after absorbing Bruce Banner's runoff gamma energy. But what we're talking about is what makes them different. Emboldened by its user's gamma physiology, each power is designed to reap different types of destruction.

Is Power Man a hulk?

With the combined powers of the Hulk, Iron Fist, and Sentry under his control, Power Man is a near-unstoppable amalgam hero. However, something as seemingly innocuous as turning into a Hulk comes at a disastrous cost when Luke finally faces death.

What if the Hulk were a normal human?

If the Hulk were just like a normal human, but bigger, he would have the same value for  $a_1$  as a normal human. However, I think for the Hulk, he is a bit bulkier than a human. Let me just say that for the Hulk, his ratio is  $1.25a_1$ . This would put his mass at: So, now I just need to put in my values for the heights and the mass of the human.

Is the Hulk a constant force?

That is how hard the Hulk pushes on the ground and how hard the ground pushes on the Hulk. Yes, this is an average force. But this is also the smallest overall force. If I consider a non-constant force, that means that there will be some part of the jump with a lower force but also some part with a greater force.

Why do Hulks have gamma mutates?

Most of their unique abilities are due to their maternal heritage rather than from their gamma exposure. Gamma-mutates like Banner and Ross are sub-conscious conduits of energy. In their Hulk forms, their bodies process the mutants' raw emotions and transform them into measurable units of energy.

If we don't use it, it goes to waste. That's because we can't store electrical energy. How can we avoid wasting it? Well, we can convert it into other forms of energy that can be stored. For example, batteries can convert ...
