

Lithium ion batteries (LIBs) as the most promising energy storage device have attracted much attention in the past decades, with the rapid development of portable electrical equipment such as mobile phones, laptops and so on [1], [2]. Nowadays, the demand of LIBs with higher energy density and longer cycling life has been proposed for their applications in ...

Energy is an important topic that is closely related to the sustainable development of national economy and national security [1]. The renewable energy, including solar, water and wind power, has the advantage of providing sustainable energy and reducing environmental pollution [2], [3]. Energy storage technology is a long-desired technique in the development of power ...

Electromagnetic wave absorption (EMA) and infrared stealth are two vital ways of anti-detection that is a great challenge to work out a compatible material with low-cost, easy to prepare and has excellent mechanical properties.

Aqueous electrolytes facilitate more sustainable battery technologies due to the attributes of being nonflammable, environmentally benign, and cost effective. Yet, water's ...

Perovskite quantum dots (QDs) show the virtue of solution processability, narrow emission spectra, and strong quantum confinement, thus holding the immense potential to be promoted for low-cost, high-color purity, ...

Zhi-Qiang Shi + Xue-Cheng Chen ... low-temperature exfoliated graphenes demonstrate an excellent energy storage performance, and the electrochemical capacitance is much higher than that of the high-temperature ...

Increasing research interest has been attracted to develop the next-generation energy storage device as the substitution of lithium-ion batteries (LIBs), considering the potential safety issue and the resource deficiency [1], [2], [3] particular, aqueous rechargeable zinc-ion batteries (ZIBs) are becoming one of the most promising alternatives owing to their reliable ...

Conspectus Cellulose is the most abundant biopolymer on Earth and has long been used as a sustainable building block of conventional paper. Note that nanocellulose accounts for nearly 40% of wood's weight and can be ...

A wave-like Cu substrate with gradient {100} texture has been proposed as the current collector for anode-free lithium batteries. The periodic wave-like structure endows the substrate with an enlarged surface to reduce the local current density, while the gradient distribution of the Cu(100) facet effectively enhances Li adsorption energy and regulates Li ...

Aqueous batteries are promising devices for electrochemical energy storage because of their high ionic conductivity, safety, low cost, and environmental friendliness. However, their voltage output and energy density are limited by the failure to form a solid-electrolyte interphase (SEI) that can expand the inherently narrow electrochemical ...

Aqueous zinc-ion batteries (ZIBs) are promising candidates for next-generation energy storage systems due to their intrinsic safety, environmental friendliness, and low cost. However, the...

Aqueous batteries are promising devices for electrochemical energy storage because of their high ionic conductivity, safety, low cost, and ...

Zinc-air batteries deliver great potential as emerging energy storage systems but suffer from sluggish kinetics of the cathode oxygen redox reactions that render unsatisfactory cycling lifespan.

In this work, a new DIB storage concept combining an environmentally friendly, transition-metal-free, abundant graphite positive electrode material, and a nonflammable water-based ...

Key aspects pertaining to water-carbon interactions and basic mechanisms of harvesting water energy with nanostructured materials are discussed and main challenges in ...

(LiPS) ,?, Mo Co₉S₈ (SV ...

Herein, we show a highly efficient photoanode system consisting of a tantalum nitride (Ta₃N₅) semiconductor for light harvesting, hole-storage layers (Ni(OH)₂/ferrhydrite) that mediate interfacial charge transfer from Ta₃N₅ to coupled ...

Energy Storage and Catalytic Energy Materials. Energy Storage Materials; Catalytic Energy Materials; Energy Saving, Environment and New Functional Materials ... CHEN Shi dicksonlao Lao Si Chon 2024-09 ...

Perovskite solar cells (PSCs) represent the fastest-developing photovoltaic (PV) technology, having attained a certified power conversion efficiency (PCE) of 26.7% ().To ...

Le Shi, Yusuf Shi, Chenlin Zhang, Sifei Zhuo, Wenbin Wang, Renyuan Li, Peng Wang*, An Integrated Photocatalytic and Photothermal Process for Solar-Driven Efficient Purification of Complex Contaminated Water, Energy Tech., 2020, 8, 2000456. 16.

Energy Storage Materials 17, 136-142, 2019. 94: ... M Chen, Q Ye, C Shi, Q Cheng, B Qie, X Liao, H Zhai, Y He, Y Yang. Batteries & Supercaps, 2019. 23: ... Water-in-Salt Battery Electrolyte for High-Voltage Supercapacitors: A Fundamental ...

Introducing interlayer water between reduced graphene oxide (rGO) nanoplatelets can help align these

nanoplatelets ($\text{Ti}_3\text{C}_2\text{T}_x$ MXene) is a 2D material with metallic conductivity, hydrophilicity, and strong mechanical ...

Aqueous batteries are promising devices for electrochemical energy storage because of their high ionic conductivity, safety, low cost, and environmental friendliness. However, their voltage output and energy density are limited by the failure to form a solid-electrolyte interphase (SEI) that can expand the inherently narrow electrochemical window of water (1.23 ...

The large-scale development of energy storage began around 2000. From 2000 to 2010, energy storage technology was developed in the laboratory. Electrochemical energy storage is the focus of research in this period. From 2011 to 2015, energy storage technology gradually matured and entered the demonstration application stage.

Here, we show "how to discover the secondary battery chemistry with the multivalent ions for energy storage" and report a new rechargeable nickel ion battery with fast ...

Zinc-ion batteries (ZIBs) have garnered significant attention in the field of energy storage and conversion due to their advantages, including high theoretical specific capacity (820 mAh/g) and low potential (-0.762 V vs. SHE, standard hydrogen electrode) [1], [2], [3], [4]. However, zinc anodes [5] have been facing challenges like dendritic formation, hydrogen ...

Interface side reactions between rhombohedral Prussian blue analogue (PBA) cathode and electrolyte are suppressed by the polymerized fluoroethylene carbonate in semi-solid state Na-ion battery, which achieves ultra-long lifetime of 3000 and 4000 cycles at 1 and 2 C, and high-rate capacity of 88 mAh g⁻¹ at 10 C, suggesting the growing significance of interface ...

Wang W., X. Chen, P. Shi, P. H. A. J. M. van Gelder, and G. Corzo, Extreme precipitation and extreme streamflow in the Dongjiang River Basin in southern China, *Hydrology and Earth System Sciences*, 4, 2323-2360, 2007. ... Chen Xi, Xunhong Chen, Stream Water Infiltration, Bank Storage, and Storage Zone Changes due to Stream-stage fluctuations ...

Additionally, Zhejiang shows the highest impacts in 2030 and 2050, with Jilin ranking the second-highest in 2050 (except for ozone depletion for which it is the third ...

Dielectric capacitors with fast charge-discharge rate and high power density are drawing more attention in pulse power equipment field. In this work, bismuth-based high entropy compound (HEC), $\text{Bi}(\text{Zn}_{0.2}\text{Mg}_{0.2}\text{Al}_{0.2}\text{Sn}_{0.2}\text{Zr}_{0.2})\text{O}_3$ (BZMASZ), was introduced into BaTiO_3 - $\text{Na}_{0.5}\text{Bi}_{0.5}\text{TiO}_3$ (BT-NBT) matrix, in order to improve the comprehensive energy ...

The understanding of the EDL structure has been developed for more than 100 years. Helmholtz defined the EDL as a simple two-plate capacitor and proposed the first EDL model [21], in which opposite charges

uniformly distribute on the interface with a linear potential drop in the Helmholtz layer (HL) (Fig. 2 c). Based on the original model, considering the ...

Read the latest articles of Energy Storage Materials at ScienceDirect , Elsevier's leading platform of peer-reviewed scholarly literature ... Minfeng Chen, Qinghua Tian, Jizhang Chen, ...
