Why is energy storage a key issue in China's power system?

Author to whom correspondence should be addressed. The construction and development of energy storage are crucial areas in the reform of China's power system. However, one of the key issues hindering energy storage investments is the ambiguity of revenue sources and the inaccurate estimation of returns.

What is the context of the energy storage industry in China?

The context of the energy storage industry in China is shown in Fig. 1. Fig. 1. The context of the energy storage industry in China [, ,]. As can be seen from Fig. 1, energy storage has achieved a transformation from scientific research to large-scale application within 20 years.

What are the application scenarios of energy storage in China?

It also introduces the application scenarios of energy storage on the power generation side, transmission and distribution side, user side and microgrid of the power system in detail. Section 3 introduces six business models of energy storage in China and analyzes their practical applications.

Why is energy storage important in China?

Energy storage assists wind farms with the storage and transportation of electrical energy. Energy storage projects in North China are currently the most in China. Due to the geographical environment, the power grid in Northwest China cannot supply power to all regions.

Does China support energy storage technology research and development?

It is entirely consistent with the fact that the Chinese government and enterprises have increased their support for energy storage technology research and development during China's 12th Five-Year Plan and 13th Five-Year Plan period. 2.2.

How a complex energy storage policy system has developed in China?

The development of energy storage industry requires promotion of the government in the aspect of technology, subsidies, safety and so on, thereby a complex energy storage policy system has developed. A lack of systematic research specifically regarding energy storage policies in China still prevails.
