

# **Compilation of energy storage energy conservation and environmental protection policy documents**

What are the energy conservation policies of buildings?

In the energy sector, the energy conservation policies of buildings (ECPB) comprise a combination of national plans, laws and mandatory regulations for energy conservation. They are widely accepted as having been effective in improving national energy efficiency and reduce carbon emissions [.,].

What is energy conservation policy?

Government policy seeks to establish a coherent set of principles for the purposes of guiding decision making, and achieving rational outcomes. In the energy sector, the energy conservation policies of buildings (ECPB) comprise a combination of national plans, laws and mandatory regulations for energy conservation.

What is China's energy conservation policy?

The Chinese government has set up the 65% reduction target of total carbon emission based on the protocol negotiated in the 2016 Paris Agreement. In the history of national development, China's energy conservation policy mechanism has significantly played an important role.

Which national policy package contains energy and building content?

It is found that before 1995, FYPs were the only national policy package which contains energy and building content. However, during 1986-1995, the major task was to develop the economy.

What was China's energy conservation strategy in the 11th FYP?

Thereafter, in the 11th FYP period of 2005-2010, the 'Energy-Saving and Emission-Reduction' strategy was formally confirmed by the State Council as the key theme of China's development. The energy conservation objectives in the 11th FYP were far more ambitious than there were in the 10th FYP.

What are the limitations of building energy conservation standards?

For example, Li and Shui inferred some limitations of current building energy conservation standards; Hong, Yan et al. reviewed the building ECPB content and compared with policies issued in other developed countries. However, their statements might be too general without enough support from comprehensive content and data analysis.

In the vibrant spring of March, table tennis illuminated the spirit of energy conservation. On March 21, CECEP grandly launched its 8th Employee Sports Day and 4th Table Tennis Tournament at the Capital University of ...
