

Customs clearance requirements for energy storage power supply exports

Why is export customs clearance important?

Export customs clearance is vital for businesses engaging in international trade with China. By following the outlined procedures and ensuring compliance with China's export regulations, businesses can streamline the export process, avoid delays, and successfully export their goods from China.

What documents do exporters need to submit to China Customs?

Export declarations to China Customs require various documents, including: Exporters can either use customs brokers or the "National Single Window" to declare their goods. Declarations must be submitted within 48 hours after transporting goods to customs supervision areas, along with any applicable fees and taxes.

How to declare exports to China Customs?

Exporters can use custom brokers to declare exports to China Customs on their behalf. Alternatively, they can use the "National Single Window" to send their export declaration data to China Customs directly. Additionally, companies must submit their export declaration within 48 hours after transporting their goods to Customs' supervision areas.

What happens to goods after China Customs clears and releases them?

Goods can finally leave the country after China Customs clears and releases them. Businesses must submit necessary documents to ensure fast product release and export. These are the parties responsible for shipping goods within the country's borders. These are the people or companies producing goods for export.

Can a business export through China Customs?

First, businesses must register with China Customs to obtain the right for export and import. However, businesses without import and export rights can still export through foreign trade companies. Documents required for export declarations from China Customs include:

How can China Customs review and release goods?

They must also pay the fees and taxes (if any) levied on the goods early and submit all relevant documents. China Customs system can pass reviews and release goods automatically if the declaration falls under a "low-risk" category. But if Customs has doubts about the goods, they can transfer them for manual review.
