## **SOLAR** PRO. Energy storage bottle valve material

#### Do gas-powered fuel cell systems need valves?

Gas-powered fuel cell systems need valves with considerably differentiated requirements in order to store and provide fuel with fuel gas such as hydrogen (H 2) or natural gas (CNG) and in order to manage the compound wastes water (H 2 O) and nitrogen (N 2)

Where are control valves used in the hydrogen value chain?

Control valves are used throughout the entire hydrogen value chain, from production and transportation to end-use, since they are key to achieving plant efficiency. At Emerson, we have extensive experience in providing the optimal solution for control valve requirements. Figure 1. Hydrogen Value Chain Diagram

#### Do you need a hydrogen valve?

Any process that moves or stores hydrogen requires a valve. You need to be assured that when designing systems for hydrogen production, transportation or storage you've got the best and safest in control and pressure relief.

What are fishertm control valves used for?

Moreover, FisherTM control valves have been used for hydrogen services in Petrochemical and Refining industries for over 50 years. Emerson has solid application experience not only with materials and process needs based on various pressures and temperatures, but also with emergent technologies such as hydrogen electrolyzer.

How to store hydrogen as a liquid for compact transportation?

Storing hydrogen as a liquid for compact transportation requires cryogenic temperature reduction below -253°C (-423°F). The integrated system for H2 liquefaction consists of three main process stages: cryogenic pre-cooling,cryogenic cooling and liquefying.

In the former case, the hydrogen is stored by altering its physical state, namely increasing the pressure (compressed gaseous hydrogen storage, CGH 2) or decreasing the ...

High performance valves for power to gas and wellheads for large-volume underground energy storage provide the highest levels of safety and set new standards. Innovative energy concept: deployment of hydrogen ball valves in ...
