

Which battery energy storage projects have been successful in Western Australia?

2.6GWh of utility-scale battery energy storage projects have been successful in Western Australia's first Capacity Investment Scheme tender. Energy storage developer Energy Vault is set to fully acquire the 125MW/1GWh Stoney Creek battery energy storage system (BESS) in New South Wales, Australia, from Enervest Group.

Is China a leader in battery energy storage?

China has been an undisputed leader in the battery energy storage system deployment by a far margin. The nation more than quadrupled its battery fleet last year, which helped it surpass its 2025 target of 30 GW of operational capacity two years early.

Are battery energy storage systems a viable option?

The renewables growth is posing growing challenges to the grid, and some provincial governments have already upped their mandatory ratios for energy storage projects to 20%, up from 10% a couple of years ago. However, as the electricity market continues to evolve, standalone battery energy storage systems are emerging as the preferred option.

Are energy storage systems vulnerable to cyberthreats?

Energy storage vulnerability to cyberthreats A recent webinar by US national nonprofit Clean Energy States Alliance (CESA) highlighted the cybersecurity risks faced by energy storage systems and laid out best practice to ensure they remain secure.

Is energy storage a good idea for small businesses?

On a smaller scale, energy storage is unlocking new economic opportunities for small businesses. By integrating renewable power with agriculture, individuals can store and supply excess energy, enhancing national grid resilience and diversity while generating profit. China has been a global leader in renewable energy for a decade.

Which battery energy storage companies won 6 GWh BESS tender?

China's Huadian announces winners in 6 GWh BESS tender with average bid at \$65/kWh The procurement exercise has attracted 67 battery energy storage companies but only six have emerged as winners. The average bid stood at CNY 0.473/Wh (\$65/kWh). Europe's grid-scale battery storage market is evolving at lightning speed.

IHS Markit analyst Julian Jansen told Energy-Storage.news as the suspension of operations was going on that his firm had been tracking a number of fires in South Korea. While Jansen anticipated that this could "create ...

India Energy Storage Alliance (IESA) is a leading industry alliance focused on the development of advanced energy storage, green hydrogen, and e-mobility techno ... India Electric Mobility Council; India Green

Hydrogen ...

From market trends and industry news to media assets - we've got you covered. News & Press Area. News & Press. Press. Accreditation; Press Events; Press Releases; ...

India preps 500 MWh battery in state of Kerala The four-hour battery energy storage system (BESS) will provide electricity to the state electricity distribution company for INR ...

The energy storage market has had a busy quarter so far. Lyten secured a domestic sulfur supply, Freyr Battery repositioned to solar, Elevated Materials entered the ...

Fluence Energy, a U.S.-based company, has introduced its latest grid-scale battery energy storage system (BESS) called Smartstack. This innovative platform offers 7.5 MWh of ...

The Philippines' first large-scale solar-plus-storage hybrid (pictured), was commissioned in early 2022. Image: ACEN. The Philippines Department of Energy (DOE) has outlined new draft market rules and policies ...

As China achieves scaled development in the green energy sector, "new energy" remains a key topic at 2025 Two Sessions, China's most important annual event outlining ...

A month later comes the 5th Energy Storage Summit USA, 28-29 March 2023 in Austin, Texas. Featuring a packed programme of panels, presentations and fireside chats from industry leaders focusing on ...

Latest news on energy storage projects, BESS, capacity expansion, and regulatory updates across Europe, US & Canada, Latin America, and Asia Pacific. Discover how energy storage solutions support renewable energy ...

China's large-scale storage market accounts for a high proportion and grows rapidly, which is the main battlefield of the energy storage industry. In 2023, China added ...

China has been an undisputed leader in the battery energy storage system deployment by a far margin. The nation more than quadrupled its battery fleet last year, which helped it surpass its 2025 target of 30 GW of operational ...

The US Energy Storage Association is the leading national voice that advocates and advances the energy storage industry to realize the goal of a better world. ... A central resource for industry news, data and other ...

The grid-scale storage station in Nanjing is an epitome of China's prospering energy storage industry as the country has put the emerging industry on a pedestal. The ...

China has been leading the world in terms of both manufacturing and deployment of battery energy storage systems. What are the key developments that we are seeing in the market today? Last year, China ...

Battery electricity storage is a key technology in the world's transition to a sustainable energy system. Battery systems can support a wide range of services needed for the transition, from ...

Energy storage system integrator HyperStrong has concluded an IPO to list its shares on the Shanghai Stock Exchange's STAR Market for science and technology innovation companies. ... Electrical Energy Storage 2025. May ...

This week, Energy-Storage.news reported that Germany's residential energy storage market continues to grow, with cumulative capacity reaching about 2.3GWh across ...

Canada still needs much more storage for net zero to succeed. Energy Storage Canada's 2022 report, Energy Storage: A Key Net Zero Pathway in Canada indicates Canada will need a minimum of 8 to 12GW of energy ...

More than 80,000 registrants are expected to attend Smarter E, across solar, energy storage, e-mobility and adjacent industries. That large number is not just relating to the fact that after more than three years of a ...

Recently, over 30 leading energy storage companies, including Southern Power, Haichen Energy, ZhiGuang Energy, and Envision Energy, unveiled new products. Among ...

Utility Dive provides news and analysis for energy and utility executives. We cover topics like smart grid tech, clean energy, regulation, generation, demand response, solar, storage, transmission ...

The US industry installed 1,067MW of energy storage in Q4 2022, but just 48MW of those were categorised as commercial and industrial (C& I) or community-scale projects, according to a recent report from Wood Mackenzie ...

Sungrow has announced that its residential energy storage system has obtained JET (Japan Electrical Safety & Environment Technology Laboratories) certification, the certified products including its SH5.5RS-JP ...

Achieving temperatures north of 3,000 F represents a breakthrough for the electric heating industry, as it enables some of the world's hardest-to-decarbonize sectors to utilize renewable energy for the first time. ...

Large-scale battery storage project in New South Wales, Australia, built with Tesla's Megapacks. Image: Edify Energy. "It won't be long" before Tesla's stationary energy storage business is shipping 100GWh a year, CEO ...

Dan Finn-Foley of Clean Energy Associates looks at the road ahead for the US battery storage industry in the

first of a series of regular, exclusive Guest Blogs for Energy-Storage.news. As the energy industry processes the ...

Using liquid air for grid-scale energy storage. New research finds liquid air energy storage could be the lowest-cost option for ensuring a continuous power supply on a future ...

SEI Sumitomo Electric Industries SMB (IEC) Standardization Management Board TEPCO Tokyo Electric Power Company Organizations, institutions and companies. 9 ... The ...

Following similar pieces the last two years, we look at the biggest energy storage projects, lithium and non-lithium, that we've reported on in 2024. The industry has gone from ...

Energy storage is a crucial technology for the integration of intermittent energy sources such as wind and solar and to ensure that there is enough energy available during high demand ... News & resources. News & ...

Energy storage installations exceeded 12 GW in 2024 despite a 20% year-over-year drop in the fourth quarter, according to the latest Energy Storage Monitor. Kaua'i Island Utility...
