

Is energy storage a precondition for large-scale integration and consumption?

So to speak,energy storage is the precondition of large-scale integration and consumption of RES. However,China's energy storage industry is at the exploration stage and far from commercialization. This restricts the development of RES to certain extent. For this reason,this paper will concentrate on China's energy storage industry.

Why is energy storage industry in China a big problem?

Judging from the present condition, cost problem is the main barrier. And the high performance and high security of the relative technology still need to be improved. Until 2020, energy storage industry in China may not be spread massively and the key point during this period is the technology research .

Why is energy storage technology needed in China?

In China,RES are experiencing rapid development. However,because of the randomness of RES and the volatility of power output,energy storage technology is needed to chip peak off and fill valley up,promoting RES utilization and economic performance.

Why is China a leader in energy storage technology?

Li added that China's dominance in energy storage technology,particularly in battery cell production,places it in a leading position to shape global storage standards. At the end of the first half,power storage capacity in China surpassed 100 GW,reaching 103.3 GW,a 47 percent year-on-year increase.

How to improve the commercialization of energy storage industry in China?

The above problems have constrained the commercialization of energy storage industry in China. Therefore, we should take relevant measures, including reducing costs by all means, perfecting technical standards, establishing advanced benefits assessment system, and improving relevant incentive policies. 4.1. Reduce costs by all means

Does energy storage industry need a policy guidance?

Sungrow Power Supply Co.,Ltd.: energy storage industry needs the policy guidance urgently. Machinery &Electronics Business; 2015-6-22: A06. Policy and innovation are key factors for the development of energy storage technology. China Electric Power News; 2016-4-28: 008. Lin Boqiang.
