How much subsidy should PV energy storage facilities be paid?

It specifies that energy storage facilities constructed synchronously with newly installed PV power generation should be paid a subsidy within 600 euro. In addition, the subsidy paid to energy storage facilities added to existing PV power generation should be within 660 euro/kW. What's more, price policies for PSS are relatively perfect in the EU.

How many kW is a solar energy storage system?

The wind power is 2×780 kW,the PV power is 300 kW. The energy storage system includes 1×2 MW×2 h PbAB,1×500 kW×15 s SCES and 5×500 kW bidirectional converters. The system can realize the flexible shift between on-grid and off-grid operation. This bidirectional balance can guarantee the island's power utilization.
