

What is a battery box?

Enter Battery Box: a local energy storage solution that helps manage the timing differences between intermittent energy generation and electricity usage. Occupying an area equivalent to just 2 car parking spaces, each Battery Box connects directly to the local electricity network, storing excess renewable energy when it is windy or sunny.

How safe is the Battery-Box?

The Battery-Box meets the highest safety standards like VDE 2510-50 (HVS/HVM/LVS) and receives many awards and seals. It is ranked as the battery with the highest efficiency on the market by the independent Energy Storage Inspection of the university HTW Berlin.

Why choose a battery-box?

The Battery-Box offers high discharge capacity, allowing for off-grid operation and emergency power capability. Whether you're powering a remote cabin or using it as backup for sensitive loads, BYD's Battery-Box has the right storage solution for you.

How does a battery box work?

Each Battery Box connects directly into the local electricity network, the same network that supplies homes, businesses, schools, and hospitals. Battery Boxes charge when the cost of electricity is low, which is normally on windy or sunny days when we have excess renewable power, or overnight when the demand for power is low.

What are the safety standards met by the Battery-Box?

The Battery-Box meets the highest safety standards like VDE 2510-50 (HVS/HVM/LVS) and receives many awards and seals.
