RSR series energy storage type stud welding machine is the use of capacitor charging, by the heat resistance produced by parent metal and the stud instantaneous release of large current to finish welding. This series welding machine introduction of foreign advanced inverter technology, selects the import high quality components, high reliability, good welding ...

The Stored Energy welding power supply - commonly called a Capacitive Discharge Welder or CD Welder - extracts energy from the power line over a period of time and stores it in welding capacitors. Thus, the effective weld energy is independent of line voltage fluctuations. This stored energy is rapidly discharged through a pulse transformer producing a ...
