

What is a BMS & battery system?

The BMS and battery systems developed are key components in new energy vehicles and other application fields, with huge market development potential. Huasi System is a Chinese high-tech company focusing on energy storage product research and development, production, sales and service.

What is Tian power high-voltage energy storage BMS system?

Tian Power high-voltage energy storage BMS system is mainly used in power grid energy storage, industrial and commercial energy storage, high-voltage home energy storage, UPS energy storage and other application fields, and can meet the application and safety requirements of battery systems within 1500V.

What are BMS products used for?

BMS products have been widely used in energy storage systems, electric two-wheeled vehicles, electric cruise ships, backup power supplies and other industrial markets.

Can the electric vehicle BMS be applied to the energy storage system?

The electric vehicle BMS cannot be directly applied to the energy storage system. Therefore, the BMS on the energy storage system needs to be developed and optimized by a professional supplier or integrator based on the actual situation of the energy storage project.

What are the different types of BMS products?

At present, the main products include automotive power battery BMS, energy storage power station BMS, intelligent lithium battery BMS, intelligent micro-storage BMS, and vehicle controller VCU, high-voltage box, monitoring screen, customized active equalization BMS, etc.

What does BMSE do?

Based on key fields such as the new energy industry chain, energy storage, and cascade utilization, BMSE takes new energy battery management technology and products as the core, and builds an industrialized battery management technology and product matrix.
