

Home energy storage cabinet stacked air conditioner pictures

How high should an air conditioner be stacked?

The stacking height of air conditioners depends on what the manufacturer's instructions are written on the packaging, although, it is safe to say that you can stack your unit at least 3 units high. Here are some additional tips to keep your stored unit in good condition and ready for its next use: Keep it separate from other items.

Can you stack air conditioners on top of each other?

Yes, you can stack your air conditioners on top of one another. However, you should only do this if the AC is put back into its original packaging. Manufacturers typically include a note about the maximum stacking height in the packaging. Read on as we talk about why you may need to store your air conditioning unit and how to properly store it.

How to store your air conditioner?

Place it in a spot with less traffic. If you have a compact and limited space, you can store your air conditioners by carefully covering and packaging them, then using them as a side table. To avoid needless harm or impact to the device, it might be positioned in corners or locations with less traffic.
