

How big of an air conditioner does a 40-foot energy storage container need

How efficient is a shipping container air conditioner?

Your air conditioner's efficiency largely depends on the size of your container. If you have more space inside your container, an AC unit with a higher BTU will be an ideal choice. When a shipping container's interior gets heated up, moisture can sometimes evaporate to the roof of the container.

What shipping container air conditioning system is right for your structure?

Determining the right shipping container air conditioning system can seem daunting, but in reality, it's simple. Consider the location and intended use of your modified shipping container. What is the climate? Will your container function as an office space, equipment storage, or something else?

Which AC unit is best for a shipping container?

If you have more space inside your container, an AC unit with a higher BTU will be an ideal choice. When a shipping container's interior gets heated up, moisture can sometimes evaporate to the roof of the container. When this moisture condenses, it drips down to the cargo forming what is often called container rain.

Does a shipping container need air conditioning?

Shipping container air conditioning is essential for modified containers. Consider installing a PTAC or heavy-duty HVAC to protect your structure. Give us a call at 877-704-0177 or email us at Sales@FalconStructures.com.
