

# How can banks provide loans for energy storage projects

Why do energy storage projects need project financing?

The rapid growth in the energy storage market is similarly driving demand for project financing. The general principles of project finance that apply to the financing of solar and wind projects also apply to energy storage projects.

Can you finance a solar energy storage project?

Since the majority of solar projects currently under construction include a storage system, lenders in the project finance markets are willing to finance the construction and cashflows of an energy storage project. However, there are certain additional considerations in structuring a project finance transaction for an energy storage project.

Will a tax credit be available for energy storage projects?

However, with the passage of the Inflation Reduction Act of 2022, tax credits are now available for standalone energy storage systems, and thus lenders may be willing to provide bridge capital that is underwritten based on the receipt of proceeds from an anticipated tax equity investment, similar to renewable energy projects.

Are solar and wind projects a good investment?

These projects will have long-term predictable revenue streams. In addition, lenders may be willing to finance merchant cashflows, but with less leverage and subject to detailed market studies and cash sweeps. These trends for solar and wind projects also apply to energy storage projects.

Are battery energy storage systems a solution to energy problems?

While the intermittence feature of clean energy doesn't allow us to have 24/7 energy, fluctuating features destabilize the grid. These scenarios are not ideal for the modern energy system. Battery energy storage systems (BESS) are accepted as one of the key solutions to address these challenges.

What is a battery energy storage system?

Battery energy storage system. Battery energy storage systems (BESS) can help address the challenge of intermittent renewable energy. Large scale deployment of this technology is hampered by perceived financial risks and lack of secured financial models.
