What makes field a great energy storage company?

The energy storage industry is no exception. At Field, they are the glue that holds us together - whether that's by bringing new talent into the business, negotiating contracts or ensuring we have a strong balance sheet. They're absolutely essential to the Field business, enabling us to do the work we do.

Where is energy storage used?

It is mainly used in power transmission and distribution systems with loads close to the equipment capacity. The energy storage is installed downstream of the power transmission and distribution equipment that originally needs to be upgraded to delay or avoid capacity expansion.

How can energy storage improve time-of-use electricity price management?

On the user side, energy storage can manage the user's time-of-use electricity price, manage capacity costs, and improve power quality. These three application scenarios are integrated with each other. When users build energy storage for time-of-use electricity price management, they also reduce load and capacity cost management.

Founded earlier this year (as Virmati Energy), Field is dedicated to building the renewable energy infrastructure and technology needed to reach net zero and avoid climate catastrophe. Field has secured a pipeline of 160MW in battery storage, in operation by Q1 2023 - with plans to get to 1.3GW operational by 2024

By prioritising the transition to clean energy, we can achieve climate targets and strengthen our energy security at the same time. If done by growing renewable and storage capacity, achieving energy security could solve multiple issues. Making cheap, green and reliable energy accessible to consumers across the UK relies on a number of factors.

The Holmston and Drum Farm energy storage systems have storage capacities of 100 MWh each, taking Field's total pipeline in or near construction to 410 MWh. When operational, both batteries will bolster the UK's energy security, help meet Scotland's 2045 net zero target and contribute to lowering energy prices for
