Should you store your energy before or after a power outage?

"With battery storage, homeowners can store energy ahead of or during these events to ensure they have electricity when they need it most," says Deborah Foley of Solar Reviews. When the electricity goes out, your heating system might stop working, too. Electric and gas furnaces, heat pumps, baseboard heaters, and wall heaters are electric.

Are you prepared for a long-term power outage?

However, long-term power outages do occur - especially during winter and extreme weather. If you aren't prepared, these power outages can become true disasters. This guide will go over how to prepare for a significant power outage, including items to have ready and steps to take.

What should I do if I have a power outage?

Purchase extra batteries or chargers. For small electronics that you would like to use during an outage, such as a cell phone, include extra charging devices in your emergency kit. A car charger, for example, can help keep your cell phone powered up. Additional batteries can help keep your flashlights going.

Should you buy non-perishable food during a power outage?

"A decent supply of non-perishables is always good to have," says Christian Schauf, CEO of survival goods company Uncharted Supply Co. Schauf favors peanut butter, freeze-dried meals, canned foods, soups, and nuts. Purchasing foods that won't need to be cooked or heated is vital during a power outage, adds Deborah Foley of Solar Reviews.

Can You Survive a power outage without emergency lighting?

While you can survive without light, having emergency lighting makes life during a power outage much more manageable (such as when you've got to go to the bathroom in the dark!). There are many options for emergency lighting. Ideally, you will have at least two different options. This would give you a backup if one stops working or isn't safe.
