

How to use the universal pendant for electric vehicle power storage bag

Do you need an EV cable bag?

An EV cable bag will protect your charging cable and keep it tidy, preventing damage, theft, and ensuring it's neatly stowed when not in use. Many EV cable charging bags are available -- but there are differences in quality and functionality you should look out for. Here's your guide to choosing an EV cable bag. Why

Why should I buy an electric car cable bag?

Prolong the longevity of your electric car's charging cable! An electric car cable bag is essential for protecting and prolonging the lifespan of your EV charging cable. The best EV charging cable bags are durable, waterproof, and dust- and corrosion-resistant.

How long should an EV charger cable bag be?

Will keep your cable free from dust and corrosion. Most charging cables are either 5 metres or 10 metres in length. So your EV charger cable bag should be large enough to accommodate your charger, without being cumbersome or having too much excess space. Invest in a cable bag that's designed to hold your specific cable length.

How do I choose the best EV charger cable bag?

So your EV charger cable bag should be large enough to accommodate your charger, without being cumbersome or having too much excess space. Invest in a cable bag that's designed to hold your specific cable length. Check the depth of the bag against the widest part of your cable to ensure a good fit.

How much do EV cable bags cost?

The cheapest EV cable bags are available for around £8. Be mindful that these cheaper bags typically have a soft shell, so may not give the highest levels of protection. You can get slightly more robust electric vehicle charger bags for just a few pounds more. Hard shell cable bags, which offer the best protection, typically start at around £30.

How do I store and carry my EV charger cable?

If you're simply looking for a way to store and carry your EV charger cable, a cheap cable bag will do the trick. But if you want proper protection, we recommend you invest in one of the more expensive options (approximately £30). It can prolong the lifespan of your charger, so you won't need to replace it as quickly -- saving you money and hassle.
