

How to write a reflection on the teaching of energy storage engineering

How to write a reflection?

Any reflections written by a professional should follow at least four steps, i.e. Description, Feelings, Evaluation and Analysis, and Action. In order to help you write as easily as possible, a systematic template is also described below: 1. Description:

What is engineering reflection guidebook?

via Note: Engineering Reflection Guidebook is licensed under CC BY-NC-SA license. Reflection is a means of extracting more learning from our experiences, leading to deep understanding of knowledge, connections to other contexts, and an improved sense of self-efficacy.

When should engineering students write reflective writing?

More effort needs be placed on reflective writing early in engineering programs, arguably from first year. Currently, reflection gets focused on design projects and team learning experiences, but not as much on their identities.

Why do professors ask students to write a reflective essay?

Professors often ask students to do this to encourage them to explore their own ideas about a text, to express their opinion rather than summarize the opinions of others. There are mainly two types of reflective writing: Experiential Reflection and Reading Reflection .

Why is reflection important?

Reflection is a means of extracting more learning from our experiences, leading to deep understanding of knowledge, connections to other contexts, and an improved sense of self-efficacy. This module provides students with essential knowledge of written reflection, including the topics of fundamental reflection and strategies in writing reflection.

Why is reflection important in experiential education?

The role of reflection is fundamental in all experiential education courses to generate learning by connecting theory to practice, deepen it by challenging learners' thinking, and document it by producing tangible expressions of the new understandings they gain by integrating experience and disciplinary knowledge.

In this section, we unpack the elements of this framing (i.e., experience, lens, meaning, action, intentional, and dialectical) of reflection and then illustrate the ideas through a ...
