

How to write a survey on the introduction of household energy equipment and energy storage products

What is the energy access guidebook?

This guidebook provides survey practitioners with the requisite tools and technical support to successfully integrate the new energy access questions into existing national household surveys. It also provides support on the computation of data collected to track the progress toward SDG 7.1, towards informing more effective policies and programs.

How should a household survey manual be prepared?

To ensure accurate coding, a manual should be prepared to give explicit guidance to the coders. This manual should contain a set of disjoint categories, which cover all acceptable responses to the questions under consideration. For a large-scale household survey, it is desirable to maximize the extent to which the questions are closed and pre-coded.

What does a household survey programme specify?

A household survey programme specifies various operations such as the target population to be covered, subject-matter concepts and definitions to be used in the questionnaire and methods of data collection and measurements to be made.

How to conduct a household survey?

To conduct a household survey, you can choose from several organizational set-ups. The most common involves data preparation in central locations after field data collection. Alternatively, you can integrate data entry with field operations, or use computer-assisted interviewing techniques.

What is a household sample survey?

A household sample survey is a key source of data on social phenomena. It is among the most flexible methods of data collection, allowing for the investigation of almost any population-based subject.

How many households will be surveyed in total?

Altogether, 38,000 households are reserved for these three surveys. The second survey being planned is a health survey in which it is expected about 10,000 households will be used, while the third survey on labour force participation will use about 12,000 households.
