

Information of the italian energy storage international exhibition

What are Italy's energy goals?

Italy's ambitious energy goals, outlined in the National Integrated Energy and Climate Plan (PNIEC), mark a transformative shift toward renewable energy. By 2030, the country is targeting 28GW of wind power and nearly 80GW of solar capacity, making energy storage essential for ensuring grid stability and maximizing renewable integration.

How many storage systems are there in Italy?

According to Italia Solare's Q1 2023 report, which is based on Gaudi data processing, at the end of the first quarter of 2023 there were 311,188 storage systems connected in Italy, with a total capacity of 2,329 MW and a maximum capacity of 3,946 MWh, in addition to Terna's installations, which total 60 MW and 250 MWh. Exhibition Manager

How many GWh of energy storage is needed in 2025?

To maintain grid stability, Terna forecasts the need for 71GWh of storage, equivalent to about 20GW of capacity by 2030. The second edition of RENMAD Storage Italia (April 2-3, 2025) will bring together leading experts and industry leaders to discuss the evolving energy storage landscape, exploring both the opportunities and challenges ahead.
