

Can Iraq meet energy needs in a way that achieves security?

Meeting energy needs in a manner that achieves security for Iraq has become a major source of concern for the electricity sector in the country; with the industry claiming that it lacks the capacity to meet current peak demand, especially with production running at about 50% of the country's requirements.

How much electricity does Iraq need?

In 2010, Iraq's demand for electricity was estimated at 57 TWh (TW (terawatt) is the largest unit used for measuring electrical power generation on a national scale. 1 TW = 10¹² Watts;), at a time when the country was unable to supply more than 58% of its energy needs, i.e. only about 33 TWh.

How can Iraq address its current electricity shortfall & growing power needs?

BAGHDAD - Iraq, one of the world's biggest energy producers, can address its current electricity shortfall and growing power needs through immediate action to relieve pressure on the system, according to an in-depth report published Thursday by the International Energy Agency.

Does Iraq need solar power?

Iraq also needs to take advantage of its abundant renewable energy potential. The analysis shows that expanding the share of solar PV and wind to 30% of electricity supply by 2030 would bring benefits both to the Iraqi consumer, in the form of reduced electricity bills, and to the environment.

Does Iraq have a good power sector?

As a major producer, Iraq's electricity sector is almost entirely dependent on fossil fuels, which account for more than 80% of power generation. Despite its vast energy resources, the performance of the country's power sector is sub-optimal.

Can Iraq cut its electricity network losses?

The new IEA report, Iraq's Energy Sector: A Roadmap to a Brighter Future, maps out immediate practical actions and medium-term measures to tackle the most pressing problems in Iraq's electricity sector. The analysis finds Iraq has huge potential to cut its electricity network losses, which are among the highest in the world.
