

Italian energy storage safety appointment consultation

Why are battery energy storage systems not being developed in Italy?

The development of Battery Energy Storage Systems (hereinafter "BESS") in Italy has been limited by the fact that the spread of renewable sources is not such as to produce significant price differences during the hours of the day yet. An unfavourable legal and regulatory framework has also contributed to the low diffusion of BESS.

Why is Italy an attractive market for energy storage systems?

To meet such requirements, the storage facilities will have to be realized with a power in both absorption and release equal to at least 9 GW. This makes Italy a particularly attractive market for energy storage systems. 1. MACSE: first consultation conducted by Terna

How does Italy guarantee a long-term supply system of new storage capacity?

The Italian legislator has acted to guarantee a long-term supply system of new storage capacity by introducing a mechanism based on competitive, transparent and non-discriminatory auctions. The system recognises the right to an annual remuneration, in exchange for the provision of the awarded capacity as part of the national energy market.

Can batteries be used for energy storage in Italy?

In Italy, batteries have become an attractive technology for electricity storage projects although they are not traditionally used.

What is Gestore Servizio Energetici?

Gestore Servizio Energetici (GSE) is the state-owned company which promotes and supports renewable energy in Italy. It fosters sustainable development by providing support for renewable electricity generation and renewable energy storage, and by taking actions to build awareness of environmentally-efficient energy uses.

What challenges will Italy face in the energy transition?

Energy transition - the need to achieve progressive and complete decarbonisation by 2050 - presents Italy with important challenges in increasing energy production from renewable resources on the one hand, and the necessary progressive increase in the availability of utility-scale energy storage capacity on the other.

Monitoring the Italian transposition of the EU regulation ... The policy options for battery storage in renewable energy communities in Italy limit the contribution of flexible assets. A clearer ...

In 2020-2021, in response to the COVID 19 pandemic, Italy has committed at least USD 54.97 billion to supporting different energy types through new or amended policies, according to official government sources and other ...

Italian energy storage safety appointment consultation

Minister of the environment and energy security Gilberto Pichetto has signed a decree allowing Italy to proceed with its energy storage capacity auction, known as MACSE, in the first half of ...

The ongoing consultation mechanism facilitates the introduction of new storage capacity. Terna indicates that by 2030, a substantial 71GWh of energy storage is needed to seamlessly integrate over 100GW of solar and wind variable ...

AMG Italian Energy Storage Srl, anche se costituita solo nel 2016, nasce con l'obiettivo di portare sul mercato mondiale un prodotto che potesse utilizzare risorse energetiche rinnovabili a zero impatto ambientale, ...

With Ministerial Decree no. 346 of 10 October 2024 (the "Macse Decree"), Italy's Ministry of the Environment and Energy Security ("MASE") has approved the proposal for the regulation of the Electricity Storage Capacity ...

Energy transition - the need to achieve progressive and complete decarbonisation by 2050 - presents Italy with important challenges in increasing energy production from ...

In December 2023, the European Union approved Italy's EUR17.7 billion energy storage plan to assist the country in building more than 9GW/71GWh of energy storage facilities. The plan, which will run until the end ...

In 2024, Italy's energy storage market saw remarkable progress, with a 24.6% rise in the number of storage systems and a 30.4% increase in total rated power, reflecting the growth of larger, more efficient installations. To maintain grid ...

In this piece, we interview executives from three developers looking to gain a foothold in the market: Aquila Clean Energy, Field Energy and Innovo Group. This is an extract of a feature which appeared in Vol.35 of PV ...

BESS, or battery energy storage systems, are an essential element of the energy transition: the Enel Group is playing an important role in the growth of the sector, in Italy and in the other countries where it is present. ... Media ...

In the meantime there will be a strong investor focus on Italian storage this year in the lead up to the first auction. Join our upcoming webinar on the Italian BESS investment case. Topic: "A new model" - how the MACSE ...

We are developing a policy framework to deliver our objectives in this area as part of the Climate Action Plan. The aim of this consultation is to gather stakeholder feedback to ...

Italian energy storage safety appointment consultation

managed by the Italian Energy Market Operator (GME), involving Terna and operators interested in utilizing storage capacity, but not directly the managers of the storage ...

The outline of the proposed MACSE regulation was published by Terna in October 2023 and submitted for public consultation, which ended on 30 November 2023. The draft is ...
