

Who owns the battery storage facility in Japan?

Project financing has been arranged by MUFG Bank representing the first battery storage project they have arranged finance for in Japan. Under the offtake agreement, Eku Energy will own the BESS while Tokyo Gas will own 100% of its operating rights for 20 years, with Eku Energy responsible for the ongoing maintenance of the facility.

Can battery aggregators promote energy storage systems in Japan?

The Japanese government has published list of battery aggregators that successfully applied to a scheme to promote energy storage systems.

How big is Japan's energy storage capacity?

Global energy storage capacity was estimated to have reached 36,735MW by the end of 2022 and is forecasted to grow to 353,880MW by 2030. Japan had 1,671MW of capacity in 2022 and this is expected to rise to 10,074MW by 2030. Listed below are the five largest energy storage projects by capacity in Japan, according to GlobalData's power database.

What are the policy settings for battery energy storage in Japan?

The policy settings in Japan support investment in Battery Energy Storage and are compatible with delivering safe, secure and reliable green energy in a cost-effective manner to energy consumers, which is our mission. Kentaro Ono, Eku Energy Japan's Managing Director, said:

What is the Hirohara battery energy storage system?

The Hirohara battery energy storage system is Eku Energy's first project in Japan set to reach Financial Close and our latest global project that combines our global energy storage specialisation coupled with our deep local presence. We are pleased to be partnering with Tokyo Gas as offtaker as we together accelerate the energy transition.

Why is battery storage important in Japan?

As the global net zero transition accelerates, Japan has introduced its GX (green transformation) policy which provides a roadmap for economic growth and emissions reductions. Increasing renewable generation is a vital part of this roadmap and battery storage has a critical role to play in balancing electricity supply and demand.

CATL, its CHC Japan partners and Shikoku Electric Power become the latest big names to spot the potential for a battery storage market in Japan: last week, Idemitsu Kosan, the country's biggest petroleum producer, ...

The Japanese government has published the list of battery aggregators that successfully applied to a scheme to promote energy storage systems. The scheme aims to increase the uptake of residential and ...

Sungrow has officially announced that its residential energy storage system has obtained JET (Japan Electrical

Safety & Environment Technology Laboratories) certification. The certified products ...

QuantumScape is on a mission to revolutionize energy storage to enable a sustainable future. The company's next-generation solid-state lithium-metal battery technology is designed to enable greater energy density, faster charging and enhanced safety to support the transition away from legacy energy sources toward a lower carbon future.

The LFP single cell 37Ah (model: 37PN), with Japanese JET certification and certifications from TÜV Rheinland Japan, has been deployed in various Pylontech modules and battery systems. In 2022, Pylontech expects ...

Japan has allocated US\$11 billion in its latest Climate Transition Bond. Image: Baywa. Research and development (R&D) into perovskite solar technology, as well as new battery storage technology ...

Singapore-headquartered renewable energy company Gurin Energy has revealed plans for a 500MW, 4-hour duration (2,000MWh) battery storage project in Japan. It's the biggest battery energy storage system ...

Government of Japan is now redesigning Energy Policy after the Great East Japan Earthquake. Storage Battery is a core technology under the current tight electricity supply and demand ...

Read more of Energy-Storage.news" coverage of Japan. Energy-Storage.news" publisher Solar Media will host the 2nd Energy Storage Summit Asia, 9-10 July 2024 in Singapore. The event will help give clarity on this ...

The nascent grid-scale energy storage market in Japan now has its first-ever dedicated investment fund, and it will be jointly managed by Gore Street Capital, which launched one of the UK's. ... new investment fund's remit is around establishing a new "green financing model" for investments in utility-scale battery energy storage system ...

JERA Nex is a new renewable energy developer launched by JERA, Japan's largest power generation company. Headquartered in London, and with a global remit, JERA Nex has a portfolio of renewable assets that includes ...

Regular readers of Energy-Storage.news will likely be aware that grid-scale battery storage activity in Japan has shown early signs of being on an upward trend, with major Japanese players and foreign market entrants ...

Global energy storage specialist, Eku Energy, has announced the Hirohara Battery Energy Storage System (BESS) located in Oaza Hirohara, Miyazaki City, Miyazaki Prefecture. The 30MW/120MWh battery is Eku's first ...

This time, Trina's household energy storage battery system won the Japan JET safety and reliability certification, another breakthrough after Trina Energy Storage became the ...

Tokyo, Japan, March 26, 2025 -- Sungrow, a global leading PV inverter and energy storage system provider, has officially announced that its residential energy storage system has ...

By 2030, official estimates show variable renewable energy reaching 20% of Japan's power mix. Noting the demand case and ever-growing renewables curtailment numbers nationwide, more and more firms are tapping ...

Battery storage developer Eku Energy has partnered with utility Tokyo Gas on a grid-scale energy storage project in Japan, with construction expected to start soon. The developer, jointly owned by a fund managed by ...

Tokyo, Japan, March 26, 2025-- Sungrow, a global leading PV inverter and energy storage system provider, has officially announced that its residential energy storage system has obtained JET (Japan Electrical Safety & Environment Technology Laboratories) certification. The certified products include the SH5.5RS-JP hybrid inverter and residential battery, with a maximum ...

Japan had 1,671MW of capacity in 2022 and this is expected to rise to 10,074MW by 2030. Listed below are the five largest energy storage projects by capacity in Japan, ...

Details Battery Storage Subsidies in Japan Introduction In the Sixth Strategic Energy Plan, published by the Japanese Government in October 2021, targets are set to (a) achieve carbon neutrality by 2050; (b) increase the share of renewables as part ...

The electro-chemical battery storage project uses lithium-ion battery storage technology. The project will be commissioned in 2018. The project is developed by Green Power Development Corporation of Japan. Buy the profile here. 5. Renova-Himeji Battery Energy Storage System. The Renova-Himeji Battery Energy Storage System is a 15,000kW lithium ...

Sala Energy intends to use the energy storage asset for trading energy in Japan's power markets. This article requires Premium Subscription Basic (FREE) Subscription. Enjoy 12 months of exclusive analysis. Subscribe ...

A battery energy storage system (BESS) comprising Tesla Megapacks with output of 10.8MW and 43MWh storage capacity has gone into operation in Sendai, Japan. Tesla Japan announced last week (4 June) that ...

This certificate, issued on the basis of JIS C 8715-2: 2019, is another sign of recognition to Pylontech in Japanese market after the receipt of JET certificate of 37Ah single battery cell (model: 37PN) and S-Mark of Force ...

Stonepeak is focused on investing in infrastructure and real estate, with approximately US\$65.1 billion of

assets under management. The company is headquartered in New York and recently made its first investment ...

Sodium-sulfur (NAS) battery storage units at a 50MW/300MWh project in Buzen, Japan. Image: NGK Insulators Ltd. The time to be skeptical about the world's ability to transition from reliance on fossil fuels to cleaner, ...

Large-scale battery energy storage systems including lithium-ion batteries are regarded as essential for full-scale introduction of renewable energy sources and also power backup source in case of power failures. These systems also ...

IPP Enlight Renewable Energy has announced the financial close of the 128MW solar and 400MWh battery energy storage system (BESS) Quail Ranch project in New Mexico, US. News ... Sungrow residential ESS achieves ...

A grid-scale battery storage project in Hokkaido, northern Japan, the only region of the country where energy storage is required for new renewable energy projects. Image: Sungrow. Japanese conglomerate Itochu, one of the country's leaders in residential battery storage sales, is launching its first grid-scale project with utility Osaka Gas ...

The certified products include the SH5.5RS-JP hybrid inverter and residential battery, with a maximum storage capacity of 12.8 kWh. ... residential energy storage system has obtained JET (Japan ...

The project has been commissioned in line with a schedule announced by the company in July 2020, as reported by Energy-Storage.news at the time. It will directly contribute to decarbonisation and increased renewable ...

Eku Energy's APAC technical lead Nick Morley, speaking in a panel discussion on the Japanese market at Energy Storage Summit Asia 2024 last month. Image: Solar Media. Macquarie-backed Eku Energy has completed the ...
