Is Greece preparing for a new energy storage auction?

Greece is gearing up for its second competitive auction for standalone, front-of-the-meter energy storage facilities connected to the electricity transmission network. The auction is part of Greece's 1 GW energy storage program.

Does Greece have a 1 GW energy storage program?

The auction is part of Greece's 1 GW energy storage program. The country announced its 1 GW energy storage program in the summer with three separate tenders featuring 400 MW, 300 MW and 300 MW of capacity. The first tender awarded 12 energy storage projects in August, with 411,79 MW of capacity in total.

Will Greece install 900 MW of storage by 2030?

According to the Greek National Energy and Climate Plan (NECP), the nation aims to install 4.3 GW of storage by 2030. Thus far, 900 MW has been allocated via the Greek Regulatory Authority for Energy, Waste, and Water (RAAEY) tenders. Therefore, the remaining share would be delivered under the new plan but without any subsidy support.

Does Greece have a battery storage pipeline?

Greece has emerged as one of the countries with the largest pipeline of battery storage projects, but as yet there has been little activity on the ground. This is changing as the long-awaited storage subsidy auctions have started, with the first projects being awarded support for both investment and operating costs.

When will Greece's second energy storage tender take place?

Greece's energy regulator has published a call for the country's second energy storage tender to take place in February 2024. Greece is gearing up for its second competitive auction for standalone, front-of-the-meter energy storage facilities connected to the electricity transmission network.

Will Greece be Europe's fourth largest battery storage market by 2030?

Jon Ferris, LCP Delta's Head of Flexibility and Storage, looks at the dynamics which could play out in rounds two and three in Europe's fourth largest market by 2030 pipeline. Greece has emerged as one of the countries with the largest pipeline of battery storage projects, but as yet there has been little activity on the ground.

Greece's energy storage market is hot with a number of new policies paving the way to new applications in the market. The government is now working a new plan, which will allow the colocation of batteries with existing ...

Greece has also seen strong progress on renewable energy, which covered 20% of its total final energy consumption in 2021. In this report, the IEA will provide a range of energy policy recommendations to help Greece smoothly manage the transition to an efficient and flexible carbon-neutral energy system.
