

Latest news on tallinn energy storage policy

How much money has Estonia provided for energy storage projects?

A state agency in Estonia has provided EUR5.2 million (US\$5.7 million) in grants for 10 energy storage projects, including a 4MW/8MWh battery storage project from utility Eesti Energia. The state-funded Environmental Investment Centre announced the grant funding for the ten projects being developed by six companies today (28 June).

Is Estonia on the brink of a major energy transition?

TALLINN - Estonia is on the brink of a major energy transition that will involve a substantial change in the role of domestically produced oil shale in its energy mix, the International Energy Agency said today in its in-depth review of the country's energy policies.

How many energy companies are there in Estonia?

The six companies are Utilitas Tallinn, Utilitas Estonia, Sunly Solar, Prategli Invest, Five Wind Energy, and Eesti Energia, and three out of the ten are heat storage projects, with the remainder for storing electricity.

What challenges will Estonia face in the transition to a cleaner energy future?

Estonia's main challenge in the transition to a cleaner energy future - one shared by many IEA countries - is the decarbonisation of its transport sector, which is currently not on track to meet short-term emissions and energy efficiency targets.

Who owns the Battery Park in Estonia?

The battery park will be called the Baltic Storage Platform, in which Evecon will have a 20 percent stake and Corsica Sole will have 80 percent stake. Climate Minister Kristen Michal (Reform) said that the emergence of reserve and storage capacities in Estonia is good news and it is particularly welcome that it is being done by private companies.

Can Eesti Energia build a large-scale energy storage facility?

Eesti Energia was unable to secure a contract for a large-scale energy storage facility through an international tender. It is expected that it would have a capacity ranging from 25 to 50 megawatt-hours that sufficiently meets the reserve needs of the Baltic countries.

Tallinn SECAP 2030 has updated the energy and climate policy of the City of Tallinn in the light of the European Union policy framework, the basic principles of Estonian climate

Samsung C& T Renewable Energy Australia has submitted plans for a 320MWh battery storage system in New South Wales to Australia's EPBC Act. Flow battery developer XL Batteries has commissioned its first organic flow ...

For as long as Soviet-era apartment buildings in "sleeping districts" in Tallinn and other larger towns in Estonia are properly maintained and renovated, they will last another 100 years, Jarek Kurnitski, director of Tallinn ...

The Port of Tallinn believes that its cold ironing facilities will play a major role in helping to achieve its goal of climate neutrality by 2050 at the latest. In a statement posted on its website this week, the Port of Tallinn said that: "In the case of the port, the action with the most
