What is a compact and highly efficient flywheel energy storage system?

Abstract: This article proposed a compact and highly efficient flywheel energy storage system. Single coreless stator and double rotor structures are used to eliminate the idling loss caused by the flux of permanent magnetic machines. A novel compact magnetic bearing is proposed to eliminate the friction loss during high-speed operation.

What is the power capacity of a new flywheel?

The novel flywheel is designed with an energy/power capability of 100 kWh/100kWand has the potential of a doubled energy... |Magnetic Bearings,Energy Storage and Lead |ResearchGate,the professional network for scientists.

Can magnetic forces stably levitate a flywheel rotor?

Moreover, the force modeling of the magnetic levitation system, including the axial thrust-force permanent magnet bearing (PMB) and the active magnetic bearing (AMB), is conducted, and results indicate that the magnetic forces could stably levitate flywheel (FW) rotor.

What are the alternative bearings for flywheel energy storage systems?

Active magnetic bearings and passive magnetic bearings are the alternative bearings for flywheel energy storage systems ,. Active magnetic bearing has advantages such as simple construction and capability of supporting large loads, but the complexity of the control system is daunting.

What is a flywheel used for?

It stores rotational kinetic energy and produces angular momentum. They can potentially be used in energy storage systems an attitude control actuator in space applications . In most conventional systems, flywheels are supported by ball bearings. ...

What is a magnetic levitation system?

Modelling of magnetic levitation system The magnetic levitation system, including an axial suspension unit and a radial suspension unit, is the core part of suspending the FW rotor to avoid friction at high rotating speed, and then the storage efficiency of the MS-FESS is further improved by reducing the maintenance loss.

This paper presents a novel combination 5-DOF active magnetic bearing (C5AMB) designed for a shaft-less, hub-less, high-strength steel energy storage flywheel (SHFES), which achieves doubled...
