

Nameplate symbols for household energy storage products

What information is found on a nameplate?

Nameplates provide useful information about equipment. Among other things, the information can be used to understand energy use, find compatible or more efficient replacements for equipment and troubleshoot problems. This fact sheet provides details about types of information found on nameplates.

What information do equipment nameplates contain?

Most equipment nameplates will have some common items of information. Many of these are self-explanatory, and include: Certification mark(s) This general information can be useful in finding out more details about particular through the manufacturer's published information. Various certification marks are shown below.

Does the Manual contain all the information of the energy storage system?

The manual does not contain all the information of the energy storage system. Please read this manual carefully and follow all safety precautions seriously before any moving, installation, operation and maintenance to ensure correct use and high performance of operation on the machine.

What are the different types of energy storage systems?

There are different types of energy storage systems - lead-acid, lithium and other various forms of electrical, electro-chemical, thermal, and mechanical energy used in uninterrupted power supply (UPS) and energy storage devices. UL published the first safety standard, UL 9540, for energy storage systems (ESS).

Which energy storage integrated machine cabinet is suitable for installation?

The energy storage integrated machine cabinet is IP20 and suitable for installation in dry, dusty environments. According to EMC standards, the energy storage integrated machine cabinet is designed to meet the installation requirements in a home environment. Select the installation site according to the following requirements:

What is the sun2000 nameplate?

Figure 2-7 shows the SUN2000 nameplate, which contains the model information, technical specifications, and compliance symbols. The nameplate figure is for reference only. The actual nameplate prevails. Table 2-3 describes the compliance symbols. The SUN2000 complies with CGC-Solar certification standards.
