

New delhi energy storage project tender announcement

Will BRPL deploy 20 mw/40 MWh battery energy storage system in Delhi?

The Energy and Research Institute (TERI) has invited bids to implement 20 MW/40 MWh battery energy storage systems (BESS) in Delhi for BSES Rajdhani Power (BRPL) under a tariff-based competitive bidding process. BRPL has planned to deploy the BESS within their licensed area and appointed TERI to invite bids from prospective bidders.

Who is eligible to bid for a battery energy storage system?

To be eligible, bidders should have commissioned and/or have battery energy storage systems connected to the grid, with a minimum capacity of 1 MWh, either in India or globally, within the last five years from the date of bid opening.

When will BRPL Teri open a bid?

BRPL has planned to deploy the BESS within their licensed area and appointed TERI to invite bids from prospective bidders. The last date to submit the bid is September 22, 2023. Bids will be opened on September 29.

How should a bid be prepared for this tender?

Before submitting a bid for this tender, bidders are advised to carefully study the tender Document. Submission of a bid shall be deemed to have been done after careful study and examination of the procedures, terms, and conditions of the tender document with full understanding of its implications.

How to submit a tender?

Before filling up the tender, all terms and conditions are read and understood carefully. The tender is submitted in two separate envelopes: Part-I for Technical Bid and Part-II for Financial Bid. Both envelopes should be put into one bigger envelope and labeled 'omplete bid' for submission.

What happens if a bidder doesn't comply with the tender documents?

A bidder's failure to furnish all information required by the tender documents or submission of a bid that is not substantially responsive to the Bid Document in every respect is at their own risk and may result in outright rejection of the bid. (9)

The first tender awarded 12 energy storage projects in August, with 411.79 MW of capacity in total. The second auction aims to award another 288.21 MW of storage capacity.
