

## New energy storage mergers and acquisitions

How much money did energy storage companies make in 2022?

Corporate funding of energy storage companies exceeded US\$26 billion worldwide in 2022, a 55% jump from 2021's total US\$17 billion. Masdar acquires UK battery storage developer Arlington Energy October 26, 2022. Masdar has acquired battery storage developer Arlington Energy in a bid to expand its presence in UK and European renewables markets.

Will energy storage drive more M&A activity?

As the ITC now includes energy storage, this category is expected to drive more M&A activity as well. Mercom Capital reported there were 23 energy storage M&A transactions through the first three quarters of 2022 compared to 15 in 2021, a trend that is expected to continue as the energy storage market matures.

Does technology M&A affect innovation performance of new energy firms?

Furthermore, technology M&A positively affects the innovation performance of new energy firms, and this effect lasts three to four years. In contrast to prior industry-wide and conclusion-inconsistent M&A studies, we concentrate on new energy industries and prove the definite positive effect of technology M&A for the firms.

### 1. Introduction

Can new energy industries promote social-economic transition?

With the aim of achieving carbon neutral, major countries such as the United States, Germany, Japan, and China, have treated the development of new energy industries as one of the key options for further promoting social-economic transition.

How does M&A impact the energy industry?

Meanwhile the utility provided by M&A activities to the wind power and photovoltaic industries causes the cumulative abnormal return to change from negative to positive. In contrast, the new energy vehicles and lithium battery industries have low returns, and after their merger, their incomes have increased significantly.
