

New energy storage policy in the gulf of west africa

Should the EU cooperate with Gulf and African States on infrastructure?

Opportunity: The EU and member states should cooperate with Gulf and African states on infrastructure, focusing on the UAE's maritime and logistics capabilities and Saudi Arabia's substantial infrastructure investment. This would enable them to accelerate critical projects, from roads to power plants and energy distribution systems.

How can the EU help the Gulf & African countries?

Initially, the EU and its member states should focus on four opportunities for cooperation with Gulf and African states. Energy cooperation and access. The growing presence of Gulf states in Africa's energy transition means Europeans can help improve access to (clean) energy across the continent.

Does the UAE re-import goods to Sub-Saharan Africa?

The UAE's foreign policy has long been more focused on trade than that of the other two Gulf states. Accordingly, trade (including those goods it re-imports and exports via its economic zones) between the UAE and sub-Saharan Africa has grown robustly over the past decade. Qatar and Saudi Arabia, meanwhile, have seen more limited change.

Why are Gulf States investing in power-generation projects & transport networks?

Gulf states are investing in power-generation projects and transport networks. These could enhance Africa's economic growth, contribute to its market expansion (also through regional integration), and make the continent more attractive for other investors.

Are Saudi Arabia & UAE investing in Africa's Oil & Gas Industry?

Saudi Arabia and the UAE are mostly eyeing investments in distribution (downstream), and transportation and storage (midstream); while they have traditionally shown limited interest in Africa's oil and gas exploration and production (upstream).

How are Gulf States transforming the image of Africa?

This has led the three Gulf states to make inroads into sub-Saharan Africa. Energy and infrastructure are at the heart of this new economic involvement. These sectors serve Gulf interests, but they are also where Africa's needs are greatest. This is improving the image of Gulf states in Africa.

to integrate more wind and solar energy into the electricity grid. The World Bank is already taking steps to address this growing need. A new, first-of-its-kind \$1 billion World Bank ...

Countries in the Economic Community of West African States (ECOWAS) will expand access to grid electricity to over 1 million people, enhance power system stability for ...
