#### Are supercapacitors the future of energy storage?

Concurrently, the depletion of fossil fuels and the pressing issue of global warming have redirected research efforts toward renewable energy sources and novel energy storage technologies. Among these, supercapacitors, fuel cells, and batteries are emerging as promising solutions to meet the growing energy demands of the future [2,3].

Could supercapacitors be an alternative electrochemical energy storage technology?

Therefore, it is believed that supercapacitors can be a potential alternative electrochemical energy storage technology to that of widely commercialised rechargeable batteries especially lithium-ion batteries.

How does a supercapacitor energy storage system work?

Abeywardana et al. implemented a standalone supercapacitor energy storage system for a solar panel and wireless sensor network (WSN). Two parallel supercapacitor banks, one for discharging and one for charging, ensure a steady power supply to the sensor network by smoothing out fluctuations from the solar panel.

Are supercapacitors a viable alternative to traditional batteries?

Supercapacitors, an electrochemical energy storage device, are rapidly gaining tractionas a viable alternative to traditional batteries in portable electronic, we arable, and medical applications [,,,,].

What is the classification of supercapacitors?

Classification of supercapacitors has been discussed. Supercapacitors are considered comparatively new generation of electrochemical energy storage devices where their operating principle and charge storage mechanism is more closely associated with those of rechargeable batteries than electrostatic capacitors.

Do supercapacitors have a high energy density?

1) The energy densities of electrochemical capacitors are not high. Currently, there remains a noticeable gap between the energy densities of supercapacitors (<20 Wh kg -1) and batteries (30-200 Wh kg -1). [474 - 476]Improving energy storage density continues to be a key research focus and challenge in the field of supercapacitors.
