

Paramaribo releases new energy storage development plan

How will the IDB finance a solar grid in Suriname?

The new operation will finance the extension of the line to the south of Powakka, connecting to the grid several villages around Koina Kondre. The IDB also financed the first solar mini grid in Suriname to provide 24/7 electricity to the isolated villages of Pokigron and Atjoni.

Can Suriname use wind energy?

The IDB supports the elaboration of a wind atlas for the coastal area, which will assess the feasibility of using wind energy in Suriname. The new operation will finance two solar mini grids interconnected to the distribution network in Brownsweg (500 kW) and in Alliance (200 kW), including an energy storage system.

What are the main objectives of the government of Suriname?

As established in the Policy Development Plan 2017-2021, one of the main objectives of the Government of Suriname (GoS) is to provide clean and reliable electricity to all the villages located in the interior of the country (Hinterland).

What is the Energy Authority of Suriname (EAS)?

One of the most important provisions included in the law is the establishment of the Energy Authority of Suriname (EAS), or the energy regulator, which among others, has the legal responsibility of preparing the expansion plan for the generation and supervising its implementation.

How will the IDB support Suriname?

With a new technical cooperation, the IDB will support Suriname in establishing a proper ecosystem for the deployment of these projects, with the collaboration of the public and private sectors.
