

What is a pioneer capacitor part number?

The Pioneer capacitor part number will begin with one of these 2 or 3 digit codes: Represented by two alphabetic letters, if they appear in your capacitor p/n it is an indication that the capacitor has certain characteristics by design. The Characteristic code only applies to Ceramic (CK or CC) and Electrolytic (CE) type capacitors.

How many types of capacitors were used in pioneer stereos?

There were fifteen types of capacitors used in Pioneer Stereos of the late 1970s. The Pioneer capacitor part number will begin with one of these 2 or 3 digit codes: Represented by two alphabetic letters, if they appear in your capacitor p/n it is an indication that the capacitor has certain characteristics by design.

What does NP mean on a pioneer stereo?

miscellaneous (NP is used exclusively to indicate a non-polar electrolytic capacitor). There were fifteen types of capacitors used in Pioneer Stereos of the late 1970s. The Pioneer capacitor part number will begin with one of these 2 or 3 digit codes:

What is a CC capacitor?

Ceramic Capacitors with Thermal Compensation (CC). The first letter of the code gives the temperature coefficient of the nominal capacitance, while the second letter indicates the capacitance tolerance. FIRST Code (Thermal Coefficient PPM/Celsius) CC Capacitor. SECOND Code (Thermal Coefficient Tolerance PPM/Celsius) CC Capacitor.

What is the NP code for a capacitor?

Working voltages are standardized at 6, 10, 16, 25, 35, 50, 68, 80, and 100V. 16 is the maximum voltage that can be supplied to the capacitor. This code is used only for indicating non-polar aluminum electrolytic capacitors and is identified by the letters NP. Down below is my Tuner Board, as you can see it's quite dirty.

What is a cebnl capacitor?

CEBNL = Aluminum Electrolytic, Axial Lead, low leakage capacitor. Ceramic Capacitors with High Dielectric Constant (CK). The first alpha letter of the Characteristic Code will represent the Temp. Range, the second alpha letter is simply a code letter. Ceramic Capacitors with Thermal Compensation (CC).
