

How much does storage cost in Spain?

Namely,from 43 EUR/MWh (lower case) to 52.5 EUR/MWh and from 47 EUR/MWh (high case) to 56.5 EUR/MWh. This is comparable with the 67 EUR/MWh LCOH for the TES with retail charges. In Spain,subsidies for storage will be granted through four calls under the PERTE ERHA1 scheme.

What is Spain's energy storage strategy?

Spain's government has approved an energy storage strategy that it says will put the country "at the forefront" of what is being done in Europe and help it move towards its 2050 climate neutrality target. The roadmap foresees the country ramping up its storage capacity from the current 8.3GW level to 20GW by 2030 and then 30GW by 2050.

Does Spain have a storage market?

Utility-scale storage remains nascent. Currently,Spain's storage market is mainly composed of small-scale batteries co-located with solar PV. Spain's household electricity prices now stand at over EUR 0.30/kWh on average. In addition,Spain's reliance on fossil gas has increased price volatility in recent years.<sup>16,17,18,19</sup>

Will Spain achieve 20GW of storage by 2030?

In addition, Spain has developed a national storage roadmap that includes a target to achieve 20GW of storage by 2030. However, current levels of customer-sited storage adoption already exceed its 2030 targets.<sup>37</sup>

What is Spain's battery storage market?

Spain's battery storage market is dominated by customer-sited systems. Utility-scale storage remains nascent. Currently,Spain's storage market is mainly composed of small-scale batteries co-located with solar PV. Spain's household electricity prices now stand at over EUR 0.30/kWh on average.

How much does electricity cost in Spain?

Spain's household electricity prices now stand at over EUR 0.30/kWh on average. In addition,Spain's reliance on fossil gas has increased price volatility in recent years.<sup>16,17,18,19</sup> This variability,combined with Spain's excellent solar resources,make the economics of combining solar with storage increasingly favorable.
