How much do electric energy storage technologies cost?

Here, we project future prices for 11 electrical energy storage technologies. We find that, regardless of technology, capital costs are on a trajectory towards US\$340 /kWh; 60 kWh-1 for installed stationary systems and US\$175 /kWh; 25 kWh-1 for battery packs once 1 TWh of capacity is installed for each technology.

How important are cost projections for electrical energy storage technologies?

Cost projections are important for understanding the role and future prices of electrical energy storage technologies. However, data are scarce and uncertain. Here, we construct experience curves to project future prices for 11 electrical energy storage technologies.

Will electricity storage capacity grow by 2030?

With growing demand for electricity storage from stationary and mobile applications, the total stock of electricity storage capacity in energy terms will need to grow from an estimated 4.67 terawatt-hours (TWh) in 2017 to 11.89-15.72 TWh (155-227% higher than in 2017) if the share of renewable energy in the energy system is to be doubled by 2030.

How many TWh of electricity storage are there?

Today, an estimated 4.67 TWh of electricity storage exists. This number remains highly uncertain, however, given the lack of comprehensive statistics for renewable energy storage capacity in energy rather than power terms.

How much does a battery energy storage system cost?

Techno-Commercial Parameter: Capital Investment (CapEx): The total capital cost for establishing the proposed Battery Energy Storage System (BESS) plant is approximately US\$31.42 Million. Land and development expenses account for 66.6% of the total capital cost, while machinery costs are estimated at US\$4.77 Million.

What is the cost range for maturing energy storage technologies?

Maturing energy storage technologies cost between US\$300 and US\$3,000 /kWh. According to this simplified categorization, emerging technologies cost above US\$600 /kWh and mature technologies below US\$500 /kWh.
