

What is Professor Meng's research group?

Professor Meng's group heads an interdisciplinary laboratory focused on energy storage (batteries and supercapacitors) and conversion (solar and magnetic). Professor Meng's research group, LESC, has been focusing its efforts on the basic science and applied research for the design and development of energy storage and conversion materials.

Who invented stationary energy storage?

Twenty years ago, when Dr. Gyuk took charge of the stationary energy storage program, the technology was only beginning to be explored. There were very few demonstrations and the rare industry meetings were only attended by a handful of researchers, scientists, and dreamers.

What does Professor Ng do?

Professor Ng's group focuses on scalable solution processing and printing methods to advance flexible electronics. Our research interests include energy generation and storage devices, to meet the powering requirements of flexible systems.

What are Professor Xu's research interests?

Professor Xu's research interests focus on understanding the electrical, mechanical, and other characteristic behaviors of functional inorganic materials when they are geometrically engineered into a soft format, and exploring these materials as building blocks for soft electronics, nano-electronics, and energy harvesting/storage devices

Is Case Western Reserve a good school to study electrochemistry?

Building upon 80 years as a top electrochemistry university, Case Western Reserve University and its faculty are applying their expertise to chemical energy storage and the development of new and better batteries.

What is Professor Tao doing?

Professor Tao and her group are creating novel low-dimensional materials for photocatalysis, photovoltaics, and energy storage. They have developed the capability to engineer metal and metal chalcogenide nanocrystals, and are exploring new methods for the chemical synthesis and self-assembly of solid-state nanostructured materials.

Four energy storage experts from the Pacific Northwest National Laboratory were among 3,300 national and international scientists named to Clarivate Analytics annual Highly Cited Researchers list. The list--released ...

Inventing new ways to produce energy and mitigate its byproducts. Chemistry plays a central role in the growing field of renewable and clean energy. As examples, we are interested in developing new ways to harness sunlight using new syntheses of carbon materials or to split water with the aid of theoretical insights; as well as investigating ...

Editorial Office of Acta Physico-Chimica Sinica. Interview with the Pioneer in the Field of Sodium Ion Energy Storage: Professor Yan Yu[J]. Acta Physico-Chimica Sinica 2020, 36(5), 1910062. doi: 10.3866/PKU.WHXB201910062

According to Research Interfaces, the following are the 10 lithium-ion battery researchers to watch.. Ying Shirley Meng. University of California, San Diego, USA. According to Research Interfaces, in order to understand ...

Professor Meng's group heads an interdisciplinary laboratory focused on energy storage (batteries and supercapacitors) and conversion (solar and magnetic). Professor Meng's ...

Professor. sagar.mitra@iitb.ac ; sagar.mitra@ese.iitb.ac . Academic Background: Ph.D, Indian Institute of Science, Bangalore, India in 2004 ... Harshita Lohani, Pratima Kumari and Sagar Mitra; Energy Storage Materials; accepted on 6 July 2022. 114. A comprehensive study of sodium copper hexacyanoferrate, as a sodium-rich low-cost positive ...

Gradient Fermi surface broadens the energy level of ion intercalation and improves the energy storage characteristic of nanoscale devices. Professor Mai Liqiang is the only ...

Grid integration, storage and other technologies are going to be critical," says Daniel Laird, director of the United States National Wind Technology Center and National Renewable Energy Laboratory and keynote ...

Liu Qingxia, Chair Professor Profile:Liu Qingxia is a member of the Canadian Academy of Engineering. He is a tenured professor in the Faculty of Chemical and Materials Engineering at the University of Alberta (Canada). He is currently a Chair Professor in the School of New Energy and New Materials at Shenzhen Technology University. He is the Director of ...

Energy storage systems (ESS) are highly attractive in enhancing the energy efficiency besides the integration of several renewable energy sources into electricity systems. ... The main problems associated with them are lack of synthetic methods, stability issues, broadening the field of research, synergistic effects and situ characterization. ...

In the field of energy storage chips, the team designed and fabricated the world's first single-nanowire electrochemical energy-storage device, achieving the breakthrough of single-nanounit electrochemical energy storage devices "from 0 to 1" [Nano Lett., 2010, 10, 4273]. ... Professor Mai Liqiang is the only corresponding author of the ...

Dr. Srikanta Moharana is currently working as Assistant Professor, Department of Chemistry, School of Applied Sciences, Centurion University of Technology and Management, Odisha, India. He received his M.Sc degree in Chemistry (2012) ...

Ashok is a Professor of Energy Storage at the University of Southern Queensland. He is a nanomaterial (carbon) and energy expert and a former Chief Scientific Officer at a listed company in graphene production and applications. ... His academic output includes over 100 published papers and seven filed patents in the fields of nanomaterials and ...

Research Team of Advanced Energy Storage Technology at ZJU-Hangzhou Global Scientific and Technological Innovation Center is looking for post-docs in the field of ...

Interview with the Pioneer in the Field of Sodium Ion Energy Storage: Professor Yan Yu. Acta Physico-Chimica Sinica [J], 2020, 36(5): 1910062. ...

Research Field Energy . The scientists in the Research Field Energy are working on a climate-neutral energy supply that is economically and socially sustainable. They pursue this aim by researching and developing innovative ...

The course focuses on relevant topics on energy storage, which is regarded as the alternative ... Associate Professor, Centre for Energy Studies (CES), Indian Institute of Technology Delhi (IIT Delhi). ... contributed to various sponsored/consultancy projects at IITD in the field of Energy Conservation, Solar thermal devices and Building Space ...

Interview with the Pioneer in the Field of Sodium Ion Energy Storage: Professor Yan Yu[J]. Acta Physico-Chimica Sinica 2020, 36(5), 1910062. doi: 10.3866/PKU.WHXB201910062 share this ...

The Faculty of Technology at the University of Turku is looking for two Professors (full) or Assistant/Associate Professors (tenure track) in Energy Technologies and Energy Storage to join us in ...

Bob Savinell. George S. Dively Professor in Engineering. Distinguished University Professor. Professor, Chemical Engineering. Develops high-performance electrochemical energy conversion and storage technologies through fundamental and applied studies of interfacial and transport processes; Development of benign, abundant electrolyte for flow batteries

Professor of Energy Storage & Conversion School of Electrical and Electronic Engineering Research interests: Resonant power supplies, Piezoelectric transformers (PTs), ...

The Institute of Energy Technologies - Fundamental Electrochemistry (IET-1) focuses on the development of performance-oriented and sustainable materials and components for the electrochemical energy storage and conversion.

(As of 13 February 2023). Li ZHU, Vice President of National Industry-Education Platform for Energy Storage of Tianjin University, President of APEC Sustainable Energy Center, Professor and doctoral Supervisor of

Tianjin University. Responsible for overall plan as a whole APSEC each work, actively organize major energy research work to implement the APEC leaders" ...

Academic Career . Since May 2020: W3 Associate Professor at the Department of Physics, TUM.. 2014 - 2020: W2 Assistant Professor at the Department of Physics, TUM.. 2010 - 2014: Group leader ("Adsorption and Electrocatalysis") at the Center for Electrochemical Sciences (CES) at Ruhr University Bochum, Germany.. 2008 - 2010: Post-doc, Department of Physics, Technical ...

Yuyan Shao, an electrochemist and materials scientist who focuses on electrochemical energy storage and conversion for both transportation and stationary applications. He has more than 100 publications and 40 patents ...

Dr. Imre Gyuk is the Director of Energy Storage Research, Office of Electricity at the U.S. Department of Energy (DOE), where he leads the energy storage research program ...

Profile of Professor XiaDr. Keyu Xia is currently a full professor working at the College of Engineering and Applied Sciences in Nanjing University. ... Professor Xia concentrates on the field of cavity quantum electrodynamics, quantum ...

The energy field is characterized by the complexity of its technical aspects, by the importance of the economic and geopolitical interests at stake and by the seriousness of the health and safety issues for the populations. ...

Yi Cui "This fellowship is designed to identify, cultivate, and connect the next generation of pioneers in search of sustainable energy for all people," said Yi Cui, the program's founder and faculty director."Each of these ...

The team works in the field of o Energy storage devices (system optimization/ characterization of storage materials)o Battery Thermal Management Systemso Green building concepts o Waste heat recovery o Renewable energy ...

Professor Wang is an expert in materials chemistry, electrochemistry, energy storage and conversion, and battery technologies. ... Dr Limei Yang currently focuses on materials for energy conversion and storage, in the fields of batteries, hydrogen, solar energy, and thermal energy. In particular, she has strong expertise in metal-based hydrogen ...
