

How much does energy storage cost?

Calculated by Guotai Junan Securities in October 2013. The target cost for the marketization of energy storage industry was about 200 dollars/kW h, equivalent to 1246 yuan/kW h. However, at present, the cost of PbAB is about 1000 yuan/kW h and the cost of NaS battery, LIB is about 4000 yuan/kW h.

How to improve the commercialization of energy storage industry in China?

The above problems have constrained the commercialization of energy storage industry in China. Therefore, we should take relevant measures, including reducing costs by all means, perfecting technical standards, establishing advanced benefits assessment system, and improving relevant incentive policies. 4.1. Reduce costs by all means

Does China's energy storage industry have a comprehensive study?

However, because of the late start of China's energy storage industry, the comprehensive study for the whole industry is very few. We found a review which provided a relatively comprehensive analysis of the technical and economic issue of it. Compared with other studies, its research has a good comprehensiveness.

Is China's energy storage a good technology?

Reviewing of the existing research, reviews of China's energy storage have been studies by some scholars. As the most mature and widely used large-scale energy storage technology, the PSS become the focus of most research , , , .

Is energy storage a key innovation field in China?

In November 2014, the State Council of China issued the Strategic Action Plan for energy development (2014-2020), confirming energy storage as one of the 9 key innovation fields and 20 key innovation directions.

What are the problems limiting the commercialization of China's energy storage?

Besides the objective technology immaturity, there exist other problems restricting the commercialization of China's energy storage including the high cost, incomplete technical standard system, imprecise evaluation system and imperfect policies. 3.1. Low technical-economic efficiency caused by high cost
