

Signed contract with finland hengyun energy storage technology

Is this Finland's largest battery energy storage system?

Swedish flexible assets developer and optimizer Ingrid Capacity has joined hands with SEB Nordic Energy's portfolio company Locus Energy to develop what is claimed to be Finland's largest and one of the Nordics' largest battery energy storage systems (BESS). The 70 MW/140 MWh BESS project will be located in Nivala, northern Finland.

When will the energy grid project start in Finland?

The project proponents have confirmed that the construction works will start in March 2025. The project, which is one of the largest of its kind in Finland, will provide grid services including frequency response and will be able to participate in energy trading on wholesale power markets.

Who is supplying the batteries for a Sungrow project?

Batteries for the site will be supplied by Sungrow, who will install a 2-hour solution with their newest model PowerTitan 2.0 liquid-cooled technology, as part of a 15-year contract with RPC. The project proponents have confirmed that the construction works will start in March 2025.
