

What does Sinopec do?

Centering on the hydrogen transportation and green hydrogen refining,Sinopec has developed a hydrogen energy integration business,realized the "integrated layout of production,transportation and hydrogen refueling",and accelerated the construction of "China's largest hydrogen energy company".

How many hydrogen refueling stations does Sinopec have?

With a focus on hydrogen transportation and green hydrogen refining,Sinopec is accelerating its hydrogen development with the establishment of more than 100 hydrogen refueling stations,owning and operating the largest number of hydrogen refueling stations in the world to date.

What is Sinopec doing in green hydrogen refining?

In the field of green hydrogen refining,Sinopec has been vigorously advancing centralized wind power and photovoltaic development,laying out mega-scale projects integrating renewable energy power generation,hydrogen production,storage,and utilization.

How much hydrogen does Sinopec produce a year?

Sinopec currently produces 3.5 million tons of hydrogen per year. In 2020,Sinopec started to advance and accelerate the construction of an integrated hydrogen energy industry chain across various fields - capital operation,technology R&D,production storage and transportation,network distribution and social cooperation.

What is Sinopec doing with new energy?

Sinopec has actively embraced the reform of new energy,advanced its layout of shale gas,coal-bed methane (CBM),geothermal energy,hydrogen energy,photovoltaic,wind power and other clean energy...

Where does a Sinopec employee work?

Workers change the billboard at a Sinopec gas station in Fuzhou, Fujian province. [Photo provided to China Daily] China Petroleum and Chemical Corp's biggest underground gas storage cluster ...

In Saudi Arabia, Yanbu Aramco Sinopec Refining Co., Ltd. (YASREF), the JV between Sinopec and Aramco, has become a model of China-Saudi energy cooperation. Meanwhile, Sinopec ...

Utilizing the abundant solar resources in Xinjiang, the Project has an electrolyzed water hydrogen plant with an annual capacity of 20,000 tons, a spherical hydrogen storage tank with a ...

The NDRC said new energy storage that uses electrochemical means is expected to see further technological advances, with its system cost to be further lowered by more than ...

Sinopec Canada is a subsidiary of Sinopec International Energy Investment (HK) Holdings Limited (SIEI) and is owned by China Petrochemical Corporation (Sinopec Group), one of the world's largest enterprises. ... Beijing. ...

China's state-controlled Sinopec on 13 March signed a strategic co-operation agreement with the country's largest electric vehicle (EV) power battery manufacturer CATL to develop battery ...

SINOPEC Kantons Holdings Limited SINOPEC Kantons Holdings Limited (Kantons Holdings) is a Hong Kong-listed red-chip subsidiary. Kantons Holdings is set up to focus on global oil storage ...

Sinopec charts big plans in clean energy. By ZHENG XIN | China Daily | Updated: 2021-11-30 08:56 ... including hydrogen refueling stations and hydrogen storage facility ...

By investing in energy storage solutions, Sinopec not only addresses energy security concerns but also complements national strategies aimed at expanding renewable ...

PipeChina, CNOOC and Sinopec facilitate energy supply and carbon emission cuts. In recent years, China's State-owned enterprises, or SOEs, have been stepping up construction of storage facilities for liquefied natural gas or ...

This strategic cooperation agreement reflects our shared will to combine our multi-energies expertise to address today's growing global demand, while simultaneously building the decarbonized energy system of tomorrow," ...

The stored thermal energy is utilized later by cooling the material back down. 2 In addition, thermal energy storage also has potential applications for waste heat recovery, solar energy utilization, energy saving in buildings, and electronic ...

SINOPEC is an international energy and chemical company that has achieved upstream, midstream and downstream integration, has ... more. HSSE . HSSE culture and the ...

In 2023, we fully constructed 57 key projects, with overall safety, quality, and progress under control. Two oil and gas field surface engineering projects, 20 refining units, one new energy ...

Sinopec chairman Ma Yongsheng said it was of great significance to ensuring national energy security - and to promoting the transformation and upgrading of the energy structure and low-carbon ...

According to its plan for the 2021-25 period, it will invest 30 billion yuan in hydrogen-related businesses, including hydrogen refueling stations and hydrogen storage facility ...

The partnership strengthens Sinopec and CATL's ongoing work in energy stations, storage, and advanced materials. The collaboration will build smart energy microgrids, featuring solar power, energy storage, charging, ...

Previously, CATL and Sinopec already established a solid cooperation in aspects like the construction and operation of integrated energy station, energy storage, energy products, new materials and technological ...

Compressed air energy storage (CAES) may become an interesting solution for countries with weak interconnection with their neighbors, according to scientists from Finland's ...

This project is one of the first compressed air energy storage projects with the largest single set of capacity in China, including the construction of 300 MW compressed air ...

Sinopec initiated China's first megaton carbon capture, utilization and storage (CCUS) project - the Sinopec Qilu-Shengli Oilfield CCUS project. The Project, expected to be put into ...

Sinopec Energy Lanka (Pvt) Ltd and the Board of Investment of Sri Lanka (BOI) have signed an agreement (Dated 14, July 14, 2023) to operate and set up fuel stations for distribution in Sri Lanka. Sinopec has invested \$100 ...

"" ,,?,,, ...

Sinopec currently produces 3.5 million tons of hydrogen per year. In 2020, Sinopec started to advance and accelerate the construction of an integrated hydrogen energy industry chain ...

Zhongyuan gas storage group Photo: Courtesy of Sinopec The largest underground natural gas storage cluster in northern China, with a capacity of 10.03 billion cubic meters, was put into operation ...

Expanding collaboration in energy infrastructure. CATL and Sinopec have previously collaborated on the construction and operation of integrated energy stations, energy ...

The Sinopec Xinjiang Kuqa Green Hydrogen Pilot Project will produce an annual green hydrogen output of 20,000 tons ... produced by the Project will supply to Sinopec Tahe Petrochemical to ...

Sinopec Announces the Launch of Carbon Footprint Alliance to Drive Green Development in Energy and Chemicals (2024-08-05) more News more Sinopec Corp China Petroleum & ...

Industry insiders such as Ma Yongsheng, president of China Petroleum and Chemical Corp, or Sinopec, have called for more preferential policies to develop carbon ...

Sinopec Canada is a diversified unconventional oil and natural gas company, focused on developing our asset

base in Alberta and north east British Columbia. The Company has a balanced mix of crude oil, liquids-rich natural ...

The LNG Storage Tank Project Signed by SEG Guangzhou Hits a Major Milestone. Sinopec Launches its Bio-aviation Fuel Shipment to Hong Kong. ... With promoting low-carbon ...

Luo said the green hydrogen industry, involving several sectors including production, supply, storage and sales, will play a key role in facilitating the country's carbon peak and neutrality goals. ... It has built over 100 ...
