

Why do businesses need energy storage?

**Grid Reliance and Energy Stability:** Businesses can use energy storage to boost their energy stability and reliance on the grid during power outages or brownouts. During a grid outage, these systems supply backup power to maintain operations and protect essential equipment and procedures. **3. Renewable Integration:**

What is energy storage & how does it work?

Energy storage, simply put, means capturing and storing energy for later use. Businesses can use an energy storage system to store excess energy produced by a renewable energy system, or to even buy electricity off the grid and store it when demand is low and prices are low.

What are the different types of energy storage systems?

Energy storage systems for businesses are most commonly batteries. But there are other forms of energy storage. They include flywheels, compressed air storage, and pumped hydro storage. Battery storage is the most flexible because of its versatility, portability, scalability, and continually declining costs. **1. Cost Savings:**

What is an independent energy storage system?

An independent energy storage system, through one or more batteries, which allows users to store electricity when it is cheaper, and dispatch it later when prices are higher.

What are the benefits of energy storage?

**Environmental Benefits:** Businesses can reduce their environmental impact and carbon footprint by implementing energy storage and reduce their use of fossil fuels. With energy storage, greater use of renewable energy, and less reliance on fossil fuels, businesses help foster sustainability and mitigate climate change.

Why do C&I businesses need a standalone storage system?

Standalone Storage enables C&I businesses to capitalize on energy volatility, prevent power outage and help to balancing the grid, thus enabling a higher penetration of renewables. Pairing a solar photovoltaic system (PV) with a BESS allows C&I customers to extract added value from their on-site asset and access new revenue streams.
