Free battery calculator! How to size your storage battery pack : calculation of Capacity, C-rating (or C-rate), ampere, and runtime for battery bank or storage system (lithium, Alkaline, LiPo, Li-ION, Nimh or Lead batteries

Is the disadvantage of NiMH cells as battery banks solely because of cost? I like the fact that you can discharge NiMH cells 100%! AND, you don't need to buy as much Amp-Hr as AGM, since with AGM cells, you can only discharge ~ 20%. So to use 1kw of energy from a battery bank, you will only need 1kw of NiMH cells, but 5kw of AGM cells.
