

What is the design target for a 10-year warranty?

MR. MAGUIRE: A 10-year warranty does not have a design target of 10 years because half of the batteries would need to be returned under warranty. The design target would have to be at least 14 or 15 years.

Why do you need warranty insurance for your energy storage system?

Our warranty insurance solutions help to secure your sustainable business in the long run. Energy storage systems often involve the complex integration of multiple high-tech components. These are all prone to failure and malfunction, particularly over long periods of ten years and more.

How long do energy storage systems last?

Energy storage systems often involve the complex integration of multiple high-tech components. These are all prone to failure and malfunction, particularly over long periods of ten years and more. As a manufacturer and system integrator you have to provide your customers with warranties.

Why do we need reliable energy storage systems?

Renewables like wind and solar energy are intermittent by nature. To successfully master the energy transition, reliable energy storage systems are a must to provide the necessary supply stability.

Many lithium home battery storage systems come with ten year warranties, but not all come with throughput warranties that allow for full daily cycling within warranty term. It is particularly important for users with variable ...

reduced by the percentage of the warranty period used. Fox ESS is a global leader in the development of inverter and energy storage solutions. FOXESS CO., LTD. No. 939, Jinhai 3rd Road, Longwan District, Wenzhou, China +86 (510) 68092998. info@fox-ess .

Where did the 10-year warranty come from? According to Rahul Walawalkar, a storage expert, the 10,000 cycle was mostly about Lithium Titanate (LTO) batteries. But the 10-year warranty is for batteries with 3500 plus cycles. If we have 1 cycle per day, 350 cycles per year, it is 3500 cycles for 10 years. So, that's the logic behind 10 year BESS warranty.
