

# The significance of my country's first offshore oilfield group energy storage power station

What is China's first offshore carbon storage project?

[Photo/Xinhua]China's first offshore million-tonne carbon storage project was put into operation on Thursday in the South China Sea,said the China National Offshore Oil Corporation.

Who is the oil field group?

“The oil field group is independently designed,constructed,installed and operated in China. It can realize drilling,well workover,unmanned remote control,comprehensive oil,gas and water treatment,independent power generation and power grid,carbon dioxide reinjection and storage and many other functions.

Which oil field has the highest daily output in the south my country sea?

After reaching full production,Enping Oilfieldwill become the oil field group with the highest daily output in the South my country Sea,continuing to supply oil and gas resources for the economic development of the Guangdong-Hong Kong-Macao Greater Bay Area.

How many Enping oilfields are there?

So far, the Enping 15-1 oilfield group, including six new oilfields, has been fully completed and put into production, with a peak daily crude oil production of more than 7,000 tons. CNOOC Shenzhen Branch announced on September 16 that the Enping 20-4 oil field located in the eastern waters of the South China Sea has been put into production.

Which oilfield group has a large-scale unmanned Intelligent Platform?

The Enping 15-1 oilfield grouphas my country's first large-scale unmanned intelligent platforms - the Enping 10-2 platform and the Enping 20-5 platform,which realize full-system,all-round,and full-sequence intelligent sensing and remote control.

Is Enping 15-1 oilfield group fully into operation?

Enping 15-1 Oilfield Group is Fully Into Operation-ORCHID ENERGY Congratulations! Enping 15-1 Oilfield Group is Fully Into Operation The Enping 15-1 oilfield group is about 200 kilometers southwest of Shenzhen,and the average water depth in the sea area is about 90 meters.

Small and medium-sized pumped storage power station is the collective name of medium and small pumped storage power station, which refers to the pumped storage power ...

In addition, output voltage fluctuations in the fixed-speed wind turbines can be mitigated by controlling the reactive power when the energy storage system is connected. Two ...

It is also beneficial to realizing long-time sustainable development objectives for offshore areas and even for
