What is the appropriate installed capacity of energy storage batteries

What is a battery energy storage system?

A battery energy storage system (BESS) is an electrochemical device that charges from the grid or a power plant and then discharges that energy to provide electricity or other grid services when needed.

What is the capacity of a battery?

This is the energy that a battery can release after it has been stored. Capacity is typically measured in watt-hours(Wh), unit prefixes like kilo (1 kWh = 1000 Wh) or mega (1 MWh = 1,000,000 Wh) are added according to the scale. The capability of a battery is the rate at which it can release stored energy.
